## **Manufacturing Bulletin**

**Subject: IDT Standard Barcode Label Change**

**Date: July 24th, 2007**

Integrated Device Technology, Inc will introduce a standard barcode label on July 24<sup>th</sup>, 2007 for intermediate packing boxes (inner container for tubes, trays, or reels). The purpose of this change is to further improve the product traceability and to standardize the barcode labels used by all shipping locations. The minor changes are as follow:

- 1) The label will now display the Lot Number (maximum of 2 lots per packing), Date code, Quantity and Country of Origin.
- 2) Part Number shown on the label will be consistent with the labels on the shipping boxes which carries the Orderable Part Number.

Please refer to the attachment for the standardized barcode label format.

Please note that this change will not impact the custom barcode labels (barcode format per customer specification) unless new format has been reviewed and approved by the customer.

During the transition period, customer may receive shipments in previous and new barcode label format.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "LS Koay", is written over a horizontal line.

LS Koay
