

## Notification to Clarify Ordering Part Number Nomenclature

Subject: Ordering Part number Nomenclature Change Notification

Date: November 17, 2008

This is to notify our customers that IDT is implementing a minor change in the ordering part number nomenclature listed in the product data sheet to align with orderable part number listed on the shipping documents such as invoice, and packing list etc.

The ordering part number is currently listed with "IDT" or "ICS" prefix. Effective immediately, the new data sheets will be created without the "IDT" or "ICS" prefix in the ordering part number. In order to standardize the ordering part number nomenclature, IDT will modify the existing data sheets.

Example:

<b>Old Ordering Part number Nomenclature</b>	<b>New Ordering Part number Nomenclature</b>
IDTCSPT857CBVG	CSPT857CBVG
IDT71V256SA10YG	71V256SA10YG
ICS952601EFLF	952601EFLF

Please note this is an ordering part number nomenclature change notification only and there are no changes to the product functional and parametric specifications and product top mark.

Please contact your local IDT sales representative if you need any additional information.

Yours sincerely,

A handwritten signature in cursive script that reads "Bimla Paul".
