

Description

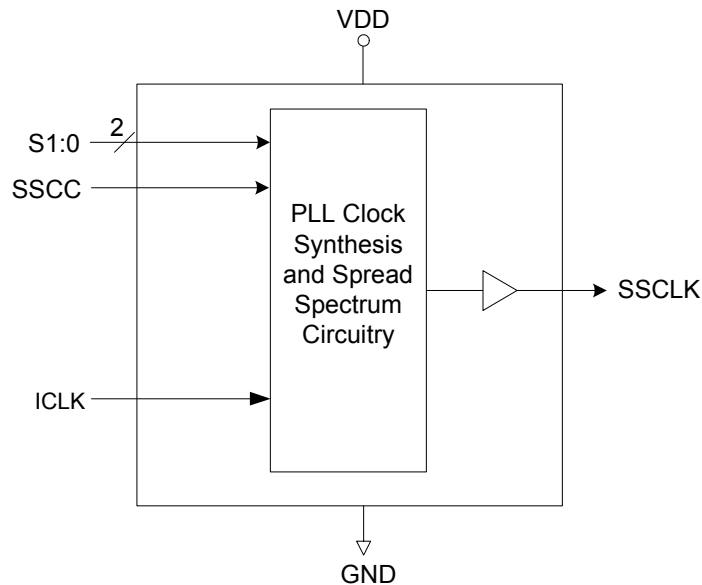

The IDT5V50015 generates a low EMI output clock from a clock or crystal input. The part is designed to dither the LCD interface clock for PDAs, printers, scanners, modems, copiers, and others. Using IDT's proprietary mix of analog and digital Phase-Locked Loop (PLL) technology, the device spreads the frequency spectrum of the output, reducing the frequency amplitude peaks by several dB.

IDT offers many other clocks for computers and computer peripherals. Consult IDT when you need to remove crystals and oscillators from your board.

Features

- Packaged in 8-pin SOIC/TSSOP
- Provides a spread spectrum output clock
- 135 MHz to 200 MHz operation
- Accepts a clock input (provides same frequency dithered output)
- Center spread modulation
- Peak reduction by 8 dB to 16 dB typical on 3rd through 19th odd harmonics
- Low EMI feature can be disabled
- Operating voltage of 3.3 V
- Advanced, low-power CMOS process

Block Diagram

Pin Assignment

Spread Direction and Percentage Select Table

S1 Pin 6	S0 Pin 7	Spread Direction	Spread Percentage
0	0	Center	±0.5
0	1	Center	±1.0
1	0	Center	±1.5
1	1	Center	±2.0

0 = connect to GND
1 = connect directly to VDD

Pin Descriptions

Pin Number	Pin Name	Pin Type	Pin Description
1	ICLK	Input	Connect to a 130–200 MHz clock input.
2	VDD	Power	Connect to +3.3 V.
3	GND	Power	Connect to ground.
4	SSCLK	Output	Clock output with spread spectrum.
5	SSCC	Input	Spread spectrum enable/disable function. SSCC function is enabled when input is high and disabled when input is low. This pin is pulled high internally.
6	S1	Input	Function select 1 input. Selects spread amount and direction per table above. Internal pull-down.
7	S0	Input	Function select 0 input. Selects spread amount and direction per table above. Internal pull-down.
8	VDD	Power	Connect to +3.3 V.

External Components

The IDT5V50015 requires a minimum number of external components for proper operation.

Decoupling Capacitor

A decoupling capacitor of $0.01\mu\text{F}$ must be connected between VDD and GND on pins 2 and 3, as close to these pins as possible. For optimum device performance, the decoupling capacitor should be mounted on the component side of the PCB. Avoid the use of vias in the decoupling circuit.

Series Termination Resistor

When the PCB trace between the clock output and the load is over 1 inch, series termination should be used. To series terminate a 50Ω trace (a commonly used trace impedance) place a 33Ω resistor in series with the clock line, as close to the clock output pin as possible. The nominal impedance of the clock output is 20Ω .

PCB Layout Recommendations

For optimum device performance and lowest output phase noise, the following guidelines should be observed.

- 1) The $0.01\mu\text{F}$ decoupling capacitor should be mounted on the component side of the board as close to the VDD pin as possible. No vias should be used between the decoupling capacitor and VDD pin. The PCB trace to VDD pin should be kept as short as possible, as should the PCB trace to the ground via.
- 2) To minimize EMI, the 33Ω series termination resistor (if needed) should be placed close to the clock output.
- 3) An optimum layout is one with all components on the same side of the board, minimizing vias through other signal layers. Other signal traces should be routed away from the IDT5V50015. This includes signal traces just underneath the device, or on layers adjacent to the ground plane layer used by the device.

Spread Spectrum Profile

The IDT5V50015 low EMI clock generator uses an optimized frequency slew rate algorithm to facilitate down stream tracking of zero delay buffers and other PLL devices. The frequency modulation amplitude is constant with variations of the input frequency.

Absolute Maximum Ratings

Stresses above the ratings listed below can cause permanent damage to the IDT5V50015. These ratings, which are standard values for IDT commercially rated parts, are stress ratings only. Functional operation of the device at these or any other conditions above those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods can affect product reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.

Item	Rating
Supply Voltage, VDD	7 V
All Inputs and Outputs	-0.5 V to VDD+0.5 V
Ambient Operating Temperature	0 to +70° C
Storage Temperature	-65 to +150° C
Junction Temperature	125° C
Soldering Temperature	260° C

Recommended Operation Conditions

Parameter	Min.	Typ.	Max.	Units
Ambient Operating Temperature	0		+70	°C
Power Supply Voltage (measured in respect to GND)	+3.0		3.6	V

Thermal Characteristics for 8TSSOP

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Thermal Resistance Junction to Ambient	θ_{JA}	Still air		110		°C/W
	θ_{JA}	1 m/s air flow		100		°C/W
	θ_{JA}	3 m/s air flow		80		°C/W
Thermal Resistance Junction to Case	θ_{JC}			35		°C/W

Thermal Characteristics for 8SOIC

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Thermal Resistance Junction to Ambient	θ_{JA}	Still air		150		°C/W
	θ_{JA}	1 m/s air flow		140		°C/W
	θ_{JA}	3 m/s air flow		120		°C/W
Thermal Resistance Junction to Case	θ_{JC}			40		°C/W
Thermal Resistance Junction to Top of Case	Ψ_{JT}	Still air		20		°C/W

DC Electrical Characteristics

Unless stated otherwise, **VDD = 3.3 V**, Ambient Temperature 0 to +70° C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		3.0	3.3	3.6	V
Supply Current	IDD	ICLK=150 MHz, Note 1		40		mA
		ICLK=200 MHz, Note 1		50		mA
Input High Voltage	V _{IH}	S1: S0	2.0			V
Input Low Voltage	V _{IL}	S1: S0			0.8	V
Output High Voltage	V _{OH}	I _{OH} = -6 mA	2.4			V
		I _{OH} = -20 mA	2.0			V
Output Low Voltage	V _{OL}	I _{OL} = 6 mA			0.4	V
		I _{OL} = 20 mA			1.2	V
Input Capacitance	C _{IN1}	All inputs	3	4	5	pF
Pull-down Resistance	R _{PD}	S1, S0		240		kΩ
Pull-up Resistance	R _{PU}	SSCC		240		kΩ

Note 1: CL = 15 pF.

AC Electrical Characteristics

Unless stated otherwise, **VDD = 3.3 V**, Ambient Temperature 0 to +70° C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Input Clock Frequency			135		200	MHz
Output Clock Frequency			135		200	MHz
Output Clock Duty Cycle		All outputs	47	50	53	%
Cycle to cycle Jitter		ICLK=150 MHz, SS on		50	100	ps
		ICLK=200 MHz, SS on		75	100	ps
Output Rise Time	t _R	20% to 80%, CL=15 pF, 150 MHz		0.9		ns
Output Fall Time	t _F	80% to 20%, CL=15 pF, 150 MHz		0.9		ns
Modulation Frequency		ICLK=200 MHz		51.2		kHz
		ICLK=150 MHz		38.4		
		ICLK=130 MHz		32

Ordering Information

Part / Order Number	Marking	Shipping Packaging	Package	Temperature
5V50015PGG	TBD	Tubes	8-pin TSSOP	0 to +70° C
5V50015PGG8		Tape and Reel	8-pin TSSOP	0 to +70° C
5V50015DCG	TBD	Tubes	8-pin SOIC	0 to +70° C
5V50015DCG8		Tape and Reel	8-pin SOIC	0 to +70° C

Parts that are ordered with a "G" after the two-letter package code are the Pb-Free configuration and are RoHS compliant.

While the information presented herein has been checked for both accuracy and reliability, Integrated Device Technology (IDT) assumes no responsibility for either its use or for the infringement of any patents or other rights of third parties, which would result from its use. No other circuits, patents, or licenses are implied. This product is intended for use in normal commercial applications. Any other applications such as those requiring extended temperature range, high reliability, or other extraordinary environmental requirements are not recommended without additional processing by IDT. IDT reserves the right to change any circuitry or specifications without notice. IDT does not authorize or warrant any IDT product for use in life support devices or critical medical instruments.

Revision History

Rev.	Originator	Date	Description of Change
E		01/28/09	Release to final.
F		03/11/09	Changed minimum input frequency from 130 to 135 MHz.

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
 - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
 - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
