

## Description

The ICS664-05 provides clock generation and conversion for clock rates commonly needed in HDTV digital video equipment. The ICS664-05 uses the latest PLL technology to provide excellent phase noise and long term jitter performance for superior synchronization and S/N ratio.

The ICS664-05 is suitable for Digital Video STB and DTV applications. For Transmitter application use ICS664-01 or ICS664-02.

For audio sampling clocks generated from 27 MHz, use the ICS661.

Please contact IDT if you have a requirement for an input and output frequency not included in this document. IDT can rapidly modify this product to meet special requirements.

## Features

- Packaged in 16-pin TSSOP
- Available in Pb (lead) free package
- Clock or crystal input provides flexibility
- Low phase noise supports enhanced SNR
- Lowest jitter in class at 100 ps typical
- Exact (0 ppm) multiplication ratios
- Improved phase noise over ICS660
- Provides High definition Video clocks for 720p, 1080i and 1080p YUV standards
- Available in commercial (0 to +70°C) and industrial (-40 to +85°C) temperature ranges

## Output Clock Selection Table

S3	S2	S1	S0	Input Frequency (MHz)	Output Frequency (MHz)
0	0	0	0		Outputs disabled
0	0	0	1	27	27
0	0	1	0	27	74.25
0	0	1	1	27	74.175824
0	1	0	0	27	67.5
0	1	0	1	67.5	27
0	1	1	0	27	148.5000
0	1	1	1	27	148.351648
1	0	0	0	74.25	54
1	0	0	1	74.175824	54
1	0	1	0	74.25	27
1	0	1	1	74.175824	27
1	1	0	0	54	74.25
1	1	0	1	54	74.175824
1	1	1	0	54	148.5
1	1	1	1	54	148.351648

## Pin Descriptions

Pin Number	Pin Name	Pin Type	Pin Description
1	X1/REFIN	Input	Connect this pin to a crystal or clock input
2	VDD	Power	Connect to +3.3 V.
3	VDD	Power	Connect to +3.3 V.
4	S0	Input	Output frequency selection. Determines output frequency per table above. Internal pull-up.
5	GND	Power	Connect to ground.
6	GND	Power	Connect to ground.
7	S3	Input	Output frequency selection. Determines output frequency per table above. Internal pull-up.
8	S2	Input	Output frequency selection. Determines output frequency per table above. Internal pull-up.
9	CLK	Output	Clock output.
10	S1	Input	Output frequency selection. Determines output frequency per table above. Internal pull-up.
11	VDDO	Power	Connect to +2.5 V to +3.3 V.
12	SEL	Input	Low for clock input, high for crystal. Internal pull-up.
13	GND	Power	Connect to ground.
14	VDD	Power	Connect to +3.3 V.
15	NC	—	No connect. Do not connect to anything.
16	X2	Input	Connect this pin to a crystal. Leave open if using a clock input.

## Application Information

### Series Termination Resistor

Clock output traces should use series termination. To series terminate a 50Ω trace (a commonly used trace impedance), place a 33Ω resistor in series with the clock line, as close to the clock output pin as possible. The nominal impedance of the clock output is 20Ω.

### Decoupling Capacitors

As with any high-performance mixed-signal IC, the ICS664-05 must be isolated from system power supply noise to perform optimally.

Decoupling capacitors of 0.01μF must be connected between each VDD and the PCB ground plane. To further guard against interfering system supply noise, the ICS664-05 should use one common connection to the PCB power plane as shown in the diagram on the next page. The ferrite bead and bulk capacitor help reduce lower frequency noise in the supply that can lead to output clock phase modulation.

### Recommended Power Supply Connection for Optimal Device Performance

All power supply pins must be connected to the same voltage, except VDDO, which may be connected to a lower voltage in order to change the output level.

To achieve the absolute minimum jitter, power the part with a dedicated LDO regulator, which will provide high isolation from power supply noise. Many companies produce very small, inexpensive regulators; an example is the National Semiconductor LP2985.

### Crystal Load Capacitors

If a crystal is used, the device crystal connections should include pads for capacitors from X1 to ground and from X2 to ground. These capacitors are used to adjust the stray capacitance of the board to match the nominally required crystal load capacitance. To reduce possible noise pickup, use very short PCB traces (and no vias) between the crystal and device.

The value of the load capacitors can be roughly determined by the formula  $C = 2(C_L - 6)$  where  $C$  is the load capacitor connected to X1 and X2, and  $C_L$  is the specified value of the load capacitance for the crystal. A typical crystal  $C_L$  is 18 pF, so  $C = 2(18 - 6) = 24$  pF. Because these capacitors adjust the stray capacitance of the PCB, check the output frequency using your final layout to see if the value of  $C$  should be changed.

### PCB Layout Recommendations

For optimum device performance and lowest output phase noise, the following guidelines should be observed.

- 1) Each 0.01μF decoupling capacitor should be mounted on the component side of the board as close to the VDD pin as possible. No vias should be used between decoupling capacitor and VDD pin. The PCB trace to VDD pin should be kept as short as possible, as should the PCB trace to the ground via. Distance of the ferrite bead and bulk decoupling from the device is less critical.
- 2) The external crystal should be mounted next to the device with short traces. The X1 and X2 traces should not be routed next to each other with minimum spaces, instead they should be separated and away from other traces.
- 3) To minimize EMI and obtain the best signal integrity, the 33Ω series termination resistor should be placed close to the clock output.
- 4) An optimum layout is one with all components on the same side of the board, minimizing vias through other signal layers (the ferrite bead and bulk decoupling capacitor can be mounted on the back). Other signal traces should be routed away from the ICS664-05. This includes signal traces just underneath the device, or on layers adjacent to the ground plane layer used by the device.

## Absolute Maximum Ratings

Stresses above the ratings listed below can cause permanent damage to the ICS664-05. These ratings, which are standard values for IDT commercially rated parts, are stress ratings only. Functional operation of the device at these or any other conditions above those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods can affect product reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.

Item	Rating
Supply Voltage, VDD	5.5 V
All Inputs and Outputs	-0.5 V to VDD+0.5 V
Ambient Operating Temperature	0 to +70° C
Storage Temperature	-65 to +150° C
Junction Temperature	125° C
Soldering Temperature	260° C

## Recommended Operation Conditions

Parameter	Min.	Typ.	Max.	Units
Ambient Operating Temperature (commercial)	0		+70	°C
Ambient Operating Temperature (industrial)	-40		+85	°C
Power Supply Voltage (measured in respect to GND)	+2.5		+3.6	V

## DC Electrical Characteristics

Unless stated otherwise, VDD = 3.3 V ±10%, Ambient Temperature -40 to +85° C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		3.0		3.6	V
	VDDO		2.5		VDD	V
Supply Current	IDD	No Load		35		mA
Input High Voltage	V <sub>IH</sub>		2			V
Input Low Voltage	V <sub>IL</sub>				0.8	V
Output High Voltage	V <sub>OH</sub>	I <sub>OH</sub> = -4 mA	VDD-0.4			V
Output High Voltage	V <sub>OH</sub>	I <sub>OH</sub> = -20 mA	2.4			V
Output Low Voltage	V <sub>OL</sub>	I <sub>OL</sub> = 20 mA			0.4	V
Short Circuit Current	I <sub>OS</sub>	Each output		±65		mA
Nominal Output Impedance	Z <sub>OUT</sub>			20		Ω
Input Capacitance	C <sub>IN</sub>	Input pins		7		pF
Internal Pull-up Resistor	R <sub>PU</sub>			120		kΩ

## AC Electrical Characteristics

Unless stated otherwise,  $V_{DD} = 3.3\text{ V} \pm 10\%$ , Ambient Temperature  $-40$  to  $+85^\circ\text{ C}$

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Crystal Frequency					28	MHz
Output Clock Rise Time	$t_{OR}$	20% to 80%, 15 pF load		1.5		ns
Output Clock Fall Time	$t_{OF}$	80% to 20%, 15 pF load		1.5		ns
Output Duty Cycle	$t_{OD}$	at $V_{DD}/2$ , 15 pF load	40	49 to 51	60	%
Power-up Time	$t_{PU}$	Valid power on to valid output		1		ms
Jitter, short term				100		ps p-p
Jitter, long term		10 $\mu\text{s}$ delay		200		ps p-p
Single Sideband Phase Noise		10 kHz offset		-120		dBc
Actual Mean Frequency Error versus Target				0		ppm

## Thermal Characteristics

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Thermal Resistance Junction to Ambient	$\theta_{JA}$	Still air		78		$^\circ\text{C/W}$
	$\theta_{JA}$	1 m/s air flow		70		$^\circ\text{C/W}$
	$\theta_{JA}$	3 m/s air flow		68		$^\circ\text{C/W}$
Thermal Resistance Junction to Case	$\theta_{JC}$			37		$^\circ\text{C/W}$

## Package Outline and Package Dimensions (16-pin TSSOP, 4.40 mm Body, 0.65 mm Pitch)

Package dimensions are kept current with JEDEC Publication No. 95, MO-153

## Ordering Information

Part / Order Number	Marking	Shipping Packaging	Package	Temperature
664G-05	664G-05	Tubes	16-pin TSSOP	0 to +70° C
664G-05T	664G-05	Tape and Reel	16-pin TSSOP	0 to +70° C
664G-05LF	664G05LF	Tubes	16-pin TSSOP	0 to +70° C
664G-05LFT	664G05LF	Tape and Reel	16-pin TSSOP	0 to +70° C
664GI-05LF	664GI05L	Tubes	16-pin TSSOP	-40 to +85° C
664GI-05LFT	664GI05L	Tape and Reel	16-pin TSSOP	-40 to +85° C

Parts that are ordered with a "LF" suffix to the part number are the Pb-Free configuration and are RoHS compliant.

While the information presented herein has been checked for both accuracy and reliability, Integrated Device Technology (IDT) assumes no responsibility for either its use or for the infringement of any patents or other rights of third parties, which would result from its use. No other circuits, patents, or licenses are implied. This product is intended for use in normal commercial applications. Any other applications such as those requiring extended temperature range, high reliability, or other extraordinary environmental requirements are not recommended without additional processing by IDT. IDT reserves the right to change any circuitry or specifications without notice. IDT does not authorize or warrant any IDT product for use in life support devices or critical medical instruments.

## Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
  - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
  - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
