General Description

The 830584I is a low skew, general purpose PCI-X 1-to-4 Fanout Buffer and a member of the family of High Performance Clock Solutions from IDT. Guaranteed output and part-to-part skew characteristics make the 830584I ideal for those clock distribution applications demanding well defined performance and repeatablility. The 830584I is designed and characterized from -40°C to 85°C for industrial applications and is packaged in an 8 TSSOP package.

Features

- General purpose and PCI-X 1:4 clock buffer
- Four single-ended LVCMOS/LVTTL clock outputs
- One single-ended LVCMOS/LVTTL clock input
- Maximum output frequency: 140MHz
- Output enable control (outputs disabled in logic low state)
- Output skew: 100ps (maximum)
- Part-to-part skew: 400ps (maximum)
- Additive phase jitter, RMS: 0.15ps (typical)
- Space-saving 8 lead TSSOP package
- Full 3.3V operating supply mode
- -40°C to 85°C ambient operating temperature
- Available in lead-free (RoHS 6) packages

Table 1. Pin Descriptions

Number	Name	Type		Description
1	CLKIN	Input		Single-ended clock input reference signal. LVCMOS/LVTTL interface levels.
2	OE	Input		Output enable control input pin. See Table 3, Function Table. LVCMOS / LVTTL interface levels.
3, 5, 7. 8	Q0, Q1, Q2, Q3	Output		Single-ended clock outputs. LVCMOS/LVTTL interface levels.
4	GND	Power		Power supply ground.
6	V_{DD}	Power		Positive supply pin.

Table 2. Pin Characteristics

Symbol	Parameter	Test Conditions	Minimum	Typical	Maximum	Units
C_{IN}	Input Capacitance			4		pF
R_{OUT}	Output Impedance			15		Ω

Table 3. Function Table

Inputs		Outputs
OE	CLKIN	Q0:Q3
0	0	0
0	1	0
1	0	0
1	1	1

Absolute Maximum Ratings

Supply Voltage, V_{DD}	4.6V
Inputs, V_I	-0.5V to V_{DD} + 0.5 V
Outputs, V_O	-0.5V to V_{DD} + 0.5V
Package Thermal Impedance, θ_{JA}	121.5°C/W (0 mps)
Storage Temperature, T_{STG}	-65°C to 150°C

NOTE: Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These ratings are stress specifications only. Functional operation of product at these conditions or any conditions beyond those listed in the *DC Characteristics* or *AC Characteristics* is not implied. Exposure to absolute maximum rating conditions for extended periods may affect product reliability.

Table 4A. Recommended Operating Conditions, V_{DD} = 3.3V ± 0.3V, TA = -40°C to 85°C

Symbol	Parameter	Test Conditions	Minimum	Typical	Maximum	Units
V_{DD}	Positive Supply Voltage		3.0	3.3	3.6	V
V_{IH}	High Level Input Voltage		0.7*V_{DD}			V
V_{IL}	Low Level Input Voltage				0.3*V_{DD}	V
V_I	Input Voltage		0		V_{DD}	V
I_{OH}	High-Level Output Current				-24	mA
I_{OL}	Low-Level Output Current				24	mA
T_A	Operating Free-Air Temperature		-40		85	°C

Table 4B. DC Characteristics, V_{DD} = 3.3V ± 0.3V, TA = -40°C to 85°C

Symbol	Parameter	Test Conditions	Minimum	Typical†	Maximum	Units
V_{IK}	Input Voltage	I_I = -18mA			–1.2	V
V_{OH}	Output High Voltage	I_{OH} = -1mA	V_{DD} – 0.2			V
		I_{OH} = -24mA	2			V
		I_{OH} = -12mA	2.4			V
V_{OL}	Output Low Voltage	I_{OL} = 1mA			0.2	V
		I_{OL} = 24mA			0.8	V
		I_{OL} = 12mA			0.55	V
I_{OH}	Output High Current	V_O = 1V	–50			mA
		V_O = 1.65V		–55		mA
I_{OL}	Output Low Current	V_O = 2V	60			mA
		V_O = 1.65V		70		mA
I_I	Input Current	V_I = 0V or V_{DD}			±150	µA
I_{DD}	Dynamic Current	f = 67MHz			37	mA
C_I	Input Capacitance	V_I = 0V or V_{DD}		3		pF
C_o	Output Capacitance	V_I = 0V or V_{DD}		3.2		pF

†All typical values are at respective nominal V_{DD} and 25°C.

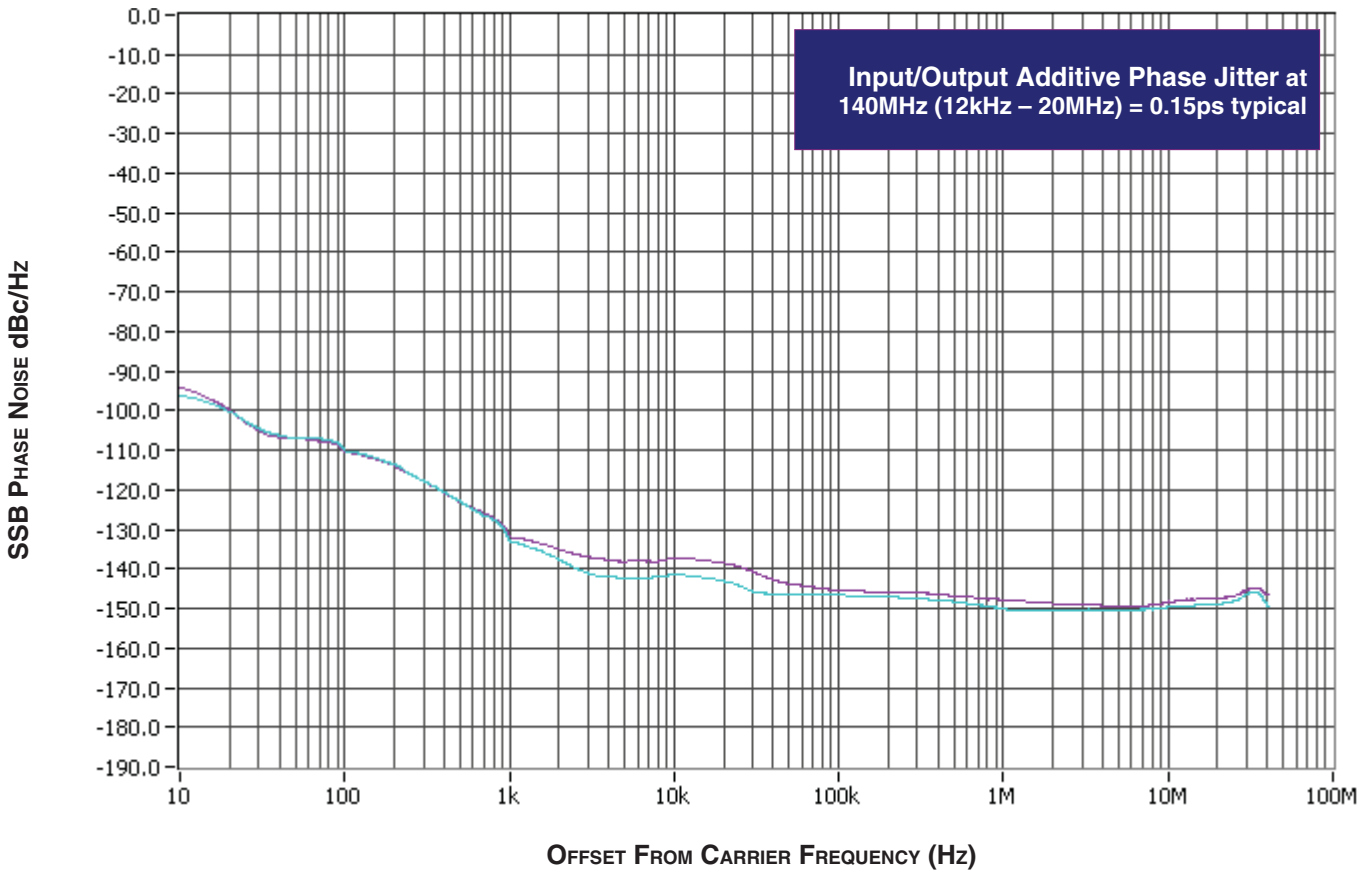
TABLE 5. AC CHARACTERISTICS, V_{DD} = 3.3V ± 0.3V, T_A = -40°C TO 85°C

Symbol	Parameter	Test Conditions	Minimum	Typical	Maximum	Units
f_{clk}	Clock Frequency; NOTE 1		0		140	MHz
tp_{LH}	Propagation Delay, Low to High; NOTE 2		1.8	2.5	3	ns
tp_{HL}	Propagation Delay, High to Low; NOTE 2		1.8	2.4	3	ns
*t*sk(o)	Output Skew; NOTE 3, 4			50	100	ps
*t*sk(p)	Pulse Skew	140MHz			170	ps
*t*sk(pr)	Process Skew			200	300	ps
*t*sk(pp)	Part-to-Part Skew; NOTE 4, 5			250	400	ps
*t*jit	Buffer Additive Phase Jitter, RMS; refer to Additive Phase Jitter section	140MHz, Integration Range: 10kHz – 20MHz		0.15		ps
T_{high}	CLK High Time	66MHz	6			ns
		140MHz	3			ns
T_{low}	CLK Low Time	66MHz	6			ns
		140MHz	3			ns
t_R	Output Rise Slew Rate‡	0.2V_{DD} to 0.6V_{DD}	1.5	2.7	4	V/ns
t_F	Output Fall Slew Rate‡	0.6V_{DD} to 0.2V_{DD}	1.5	2.7	4	V/ns

†All typical values are at respective nominal V_{DD}.
‡This symbol is according to PCI-X terminology.
NOTE 1: Switching characteristics over recommended ranges of supply voltages and operating free-air temperature, C_L = 10pF, V_{DD} = 3.3V ± 0.3V.
NOTE 2: Measured from $V_{DD}/2$ of the input to $V_{DD}/2$ of the output.
NOTE 3: Defined as skew between outputs at the same supply voltage and with equal load conditions. Measured at $V_{DD}/2$.
NOTE 4: This parameter is defined in accordance with JEDEC Standard 65.
NOTE 5: Defined as skew between outputs on different devices operating a the same supply voltages and with equal load conditions. Using the same type of input on each device, the output is measured at $V_{DD}/2$.

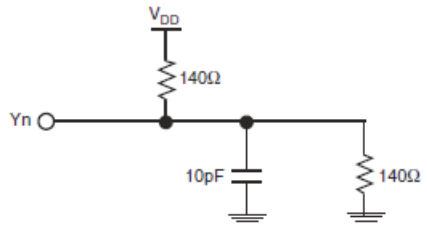
Additive Phase Jitter

The spectral purity in a band at a specific offset from the fundamental compared to the power of the fundamental is called the ***dBc Phase Noise.*** This value is normally expressed using a Phase noise plot and is most often the specified plot in many applications. Phase noise is defined as the ratio of the noise power present in a 1Hz band at a specified offset from the fundamental frequency to the power value of the fundamental. This ratio is expressed in decibels (dBm) or a ratio of the power in the 1Hz band to the power in the fundamental. When the required offset is specified, the phase noise is called a ***dBc*** value, which simply means dBm at a specified offset from the fundamental. By investigating jitter in the frequency domain, we get a better understanding of its effects on the desired application over the entire time record of the signal. It is mathematically possible to calculate an expected bit error rate given a phase noise plot.

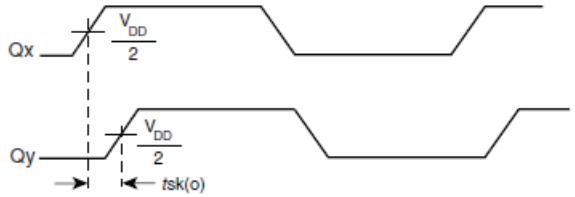


As with most timing specifications, phase noise measurements has issues relating to the limitations of the equipment. Often the noise floor of the equipment is higher than the noise floor of the device. This is illustrated above. The device meets the noise floor of what is shown, but can actually be lower. The phase noise is dependent on the input source and measurement equipment.

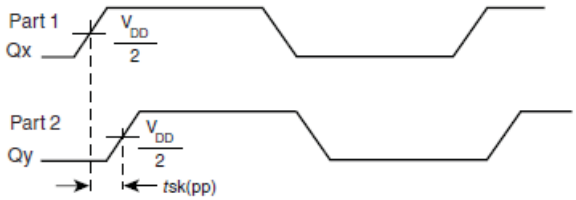
Parameter Measurement Information



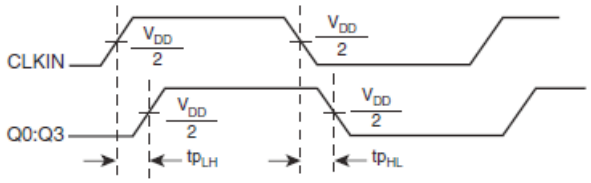
3.3V Core/3.3V Output Load AC Test Circuit



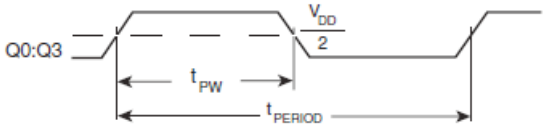
Output Skew



Part-to-Part Skew

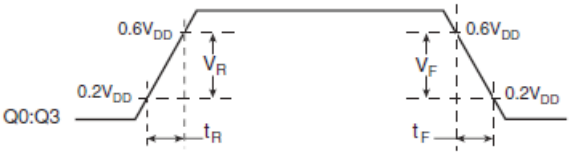


Propagation Delay

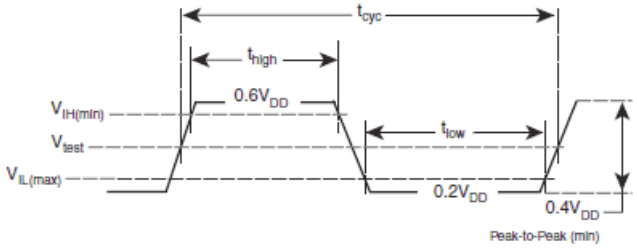


$$odc = \frac{t_{PW}}{t_{PERIOD}} \times 100\%$$

Output Duty Cycle/Pulse Width/Period



Output Rise/Fall Slew Rates



Parameter	Value	Unit
$V_{IH(min)}$	$0.5V_{DD}$	V
$V_{IL(max)}$	$0.35V_{DD}$	V
V_{test}	$0.4V_{DD}$	V

NOTE: All parameters are according to PCI-X 1.0 specifications

Application Information

Recommendations for Unused Input and Output Pins

Inputs:

OE Input
The OE pin must be tied either HIGH or LOW. Do not leave floating.

Outputs:

LVCMOS Outputs
All unused LVCMOS outputs can be left floating. We recommend that there is no trace attached.

Reliability Information

REVISION HISTORY SHEET				
Rev	**Table**	**Page**	**Description of Change**	**Date**
B	T4B	3	DC Characteristics Table - corrected Input Current typo from ±5µA max. to ±150µA max.	3/18/08
B	T8	1 10	General Description - removed ICS Chip and HiPerClockS. Ordering Information - removed ICS under Part/Order Number. Removed 2500 for Tape & Reel. Removed LF Note below table. Updated Header and Footer.	12/16/15

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.
   Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.
(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
