

## Low EMI, Spread Modulating, Clock Generator

### Features:

- ICS91718 is a Spread Spectrum Clock targeted for Mobile PC and LCD panel applications. Generates an EMI optimized clock signal (EMI peak reduction of 7-14 dB on 3rd-19th harmonics) through use of Spread Spectrum techniques.
- ICS91718 operates with input frequencies at 14.318 - 80 MHz.
- Spread modulation frequency range is 20kHz to 40kHz.
- Spread percentage/type programming through I<sup>2</sup>C.

### Specifications:

- Supply Voltages: V<sub>DD</sub> = 3.3V ±0.3V
- Cyc to Cyc jitter: <150ps
- Output duty cycle 45/55%
- Guarantees +85°C operational condition
- 8-pin SOIC (150 mil) package

### Pin Configuration

CLKIN	1	8	PD#*
VDD	2	7	SCLK
GND	3	6	SDATA
**CLKOUT/FS_IN0	4	5	REF_OUT/FS_IN1**

### 8-pin SOIC & TSSOP

Notes:

- \* Internal pull-up resistor
- \*\* Internal pull-down resistor

### Input Select Functionality

FS_IN1	FS_IN0	MHz	SPREAD %
0	0	14.318 in 48.00 out	-1.0% down sprd
0	1	14.318 in 66.66 out	-1.0% down sprd
1	0	48.00 in/out 66.66 in/out	-1.0% down sprd
1	1	48.00 in/out 66.66 in/out	+/-1.0% center sprd

### Pin Descriptions

PIN #	PIN NAME	PIN TYPE	DESCRIPTION
1	CLKIN	INPUT	Input clock
2	VDD	POWER	Power supply, nominal 3.3V
3	GND	POWER	Ground pin.
4	**CLKOUT/FS_IN0	I/O	CLKOUT modulated clock output FS_IN0 latched input, selects modulation percentage/type
5	REF_OUT/FS_IN1**	I/O	REF_OUT, unmodulated reference clock output FS_IN1 latched input, selects modulation percentage/type
6	SDATA	I/O	Data pin for I2C circuitry 5V tolerant
7	SCLK	INPUT	Clock pin of I2C circuitry 5V tolerant
8	PD#*	INPUT	Asynchronous active low input pin used to power down the device into a low power state. The internal clocks are disabled and the VCO and the crystal are stopped. The latency of the power down will not be greater than 1.8ms.

\* Internal Pull-Up Resistor

\*\* Internal Pull-Down Resistor

**Table 1: Frequency Configuration Table

For 14.318 in 48.008 out default is...00001  
 For 14.318 in 66.66 out default is..01101  
 For 48/48 and 66/66 default is.....10001

## General I<sup>2</sup>C serial interface information

The information in this section assumes familiarity with I<sup>2</sup>C programming. For more information, contact ICS for an I<sup>2</sup>C programming application note.

### How to Write:

- Controller (host) sends a start bit.
- Controller (host) sends the write address D4<sub>(H)</sub>
- ICS clock will **acknowledge**
- Controller (host) sends a dummy command code
- ICS clock will **acknowledge**
- Controller (host) sends a dummy byte count
- ICS clock will **acknowledge**
- Controller (host) starts sending first byte (Byte 0) through byte 6
- ICS clock will **acknowledge** each byte **one at a time**.
- Controller (host) sends a Stop bit

How to Write:	
Controller (Host)	ICS (Slave/Receiver)
Start Bit	
Address D4 <sub>(H)</sub>	
	<b>ACK</b>
Dummy Command Code	
	<b>ACK</b>
Dummy Byte Count	
	<b>ACK</b>
Byte 0	
	<b>ACK</b>
Byte 1	
	<b>ACK</b>
Byte 2	
	<b>ACK</b>
Byte 3	
	<b>ACK</b>
Byte 4	
	<b>ACK</b>
Byte 5	
	<b>ACK</b>
Byte 6	
	<b>ACK</b>
Byte 7	
	<b>ACK</b>
Stop Bit	

### How to Read:

- Controller (host) will send start bit.
- Controller (host) sends the read address D5<sub>(H)</sub>
- ICS clock will **acknowledge**
- ICS clock will send the **byte count**
- Controller (host) acknowledges
- ICS clock sends first byte (**Byte 0**) through **byte 7**
- Controller (host) will need to acknowledge each byte
- Controller (host) will send a stop bit

How to Read:	
Controller (Host)	ICS (Slave/Receiver)
Start Bit	
Address D5 <sub>(H)</sub>	
	<b>ACK</b>
	<b>Byte Count</b>
ACK	
	<b>Byte 0</b>
ACK	
	<b>Byte 1</b>
ACK	
	<b>Byte 2</b>
ACK	
	<b>Byte 3</b>
ACK	
	<b>Byte 4</b>
ACK	
	<b>Byte 5</b>
ACK	
	<b>Byte 6</b>
ACK	
	<b>Byte 7</b>
Stop Bit	

### Notes:

1. The ICS clock generator is a slave/receiver, I<sup>2</sup>C component. It can read back the data stored in the latches for verification. **Read-Back will support Intel PIIX4 "Block-Read" protocol.**
2. The data transfer rate supported by this clock generator is 100K bits/sec or less (standard mode)
3. The input is operating at 3.3V logic levels.
4. The data byte format is 8 bit bytes.
5. To simplify the clock generator I<sup>2</sup>C interface, the protocol is set to use only "**Block-Writes**" from the controller. The bytes must be accessed in sequential order from lowest to highest byte with the ability to stop after any complete byte has been transferred. The Command code and Byte count shown above must be sent, but the data is ignored for those two bytes. The data is loaded until a Stop sequence is issued.
6. At power-on, all registers are set to a default condition, as shown.

BYTE	Affected Pin			TYPE	Bit Control		PWD

### Absolute Maximum Ratings

Supply Voltage . . . . . 3.7 V  
 Voltage on any pin with respect to GND . . . -0.5 to +3.7 V  
 Storage Temperature . . . . . -55°C to +125°C  
 Operating Temperature . . . . . 0°C to +85°C  
 Power Dissipation . . . . . 0.5 W

Stresses above those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These ratings are stress specifications only and functional operation of the device at these or any other conditions above those listed in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect product reliability.

### Electrical Characteristics - Input/Supply/Common Output Parameters

T<sub>A</sub> = 0 - 85°C; Supply Voltage V<sub>DD</sub> = 3.3 V +/-5%

PARAMETER	SYMBOL	CONDITIONS	MIN	TYP	MAX	UNITS
Input High Voltage	V <sub>IH</sub>		2		V <sub>DD</sub> + 0.3	V
Input Low Voltage	V <sub>IL</sub>		V <sub>SS</sub> - 0.3		0.8	V
Input High Current	I <sub>IH</sub>	V <sub>IN</sub> = V <sub>DD</sub>	-5		5	∠A
Input Low Current	I <sub>IL1</sub>	V <sub>IN</sub> = 0 V; Inputs with no pull-up resistors	-5			∠A
Supply Current	I <sub>DD</sub>	f <sub>IN</sub> = 14.318MHz		27	35	mA
		f <sub>IN</sub> = 66.66MHz		42	50	mA
Powerdown Current	I <sub>DD3.3PD</sub>			3	5	mA
Pin Inductance	L <sub>pin</sub>				7	nH
Pin Capacitance <sup>1</sup>	C <sub>IN</sub>	Logic Inputs			5	pF
	C <sub>OUT</sub>	Output pin capacitance			6	pF
Transition time <sup>1</sup>	T <sub>trans</sub>	To 1st crossing of target frequency			3	ms
Settling time <sup>1</sup>	T <sub>s</sub>	From 1st crossing to 1% target frequency			3	ms
Clk Stabilization <sup>1</sup>	T <sub>STAB</sub>	From V <sub>DD</sub> = 3.3 V to 1% target frequency		1	3	ms
Delay <sup>1</sup>	t <sub>PZH</sub> , t <sub>PZL</sub>	Output enable delay (all outputs)	1		10	ns

<sup>1</sup>Guaranteed by design, not 100% tested in production.

### AC Electrical Characteristics

T<sub>A</sub> = 0 - 70°C; Supply Voltage V<sub>DD</sub> = 3.3 V ±0.3V

PARAMETER	DESCRIPTION	TEST CONDITION	MIN	TYP	MAX	UNITS
F <sub>IN</sub>	Input Frequency	Input Clock	14.318		80	MHz
f <sub>OUT</sub>	Output Frequency	Spread Off	14.318		80	MHz
t <sub>R</sub>	Output Rise Time	15 pF load, 0.8V - 2.4V	0.5		1	ns
t <sub>F</sub>	Output Fall Time	15 pF load, 2.4 - 0.8V	0.5		1	ns
I <sub>OD</sub>	Output Duty Cycle	15 pf load	45		55	%
t <sub>ID</sub>	Input Duty Cycle		45		55	%
t <sub>JCYC</sub>	Jitter, Cycle-to-Cycle				250	ps

**Electrical Characteristics - CLOCK\_OUT**

$T_A = 0 - 85^{\circ}\text{C}$ ;  $V_{DD} = 3.3\text{V} \pm 5\%$ ;  $C_L = 10\text{-}20\text{ pF}$  (unless otherwise specified)

PARAMETER	SYMBOL	CONDITIONS	MIN	TYP	MAX	UNITS
Current Source Output Impedance	$Z_{O1}$ <sup>1</sup>	$V_O = V_x$	3000			(
Output High Voltage	$V_{OH3}$	$I_{OH} = -1\text{ mA}$	2.4			V
Output Low Voltage	$V_{OL3}$	$I_{OL} = 1\text{ mA}$			0.4	
Rise Time	$t_{r3}$	$V_{OL} = 0.41\text{V}$ , $V_{OH} = 0.86\text{V}$	0.5		1	ns
Fall Time	$t_{f3}$	$V_{OH} = 0.86\text{V}$ $V_{OL} = 0.41\text{V}$	0.5		1	ns
Duty Cycle	$d_{t3}$	$V_T = 50\%$	45	51	55	%
Jitter, Cycle to cycle	$t_{j\text{cyc-cyc}}$ <sup>1</sup>	$V_T = 50\%$			250	ps

<sup>1</sup>Guaranteed by design, not 100% tested in production.

<sup>2</sup>  $I_{O\text{WT}}$  can be varied and is selectable thru the MULTSEL pin.

**Electrical Characteristics - REF**

$T_A = 0 - 85^{\circ}\text{C}$ ;  $V_{DD} = 3.3\text{V} \pm 5\%$ ;  $C_L = 10\text{-}20\text{ pF}$  (unless otherwise specified)

PARAMETER	SYMBOL	CONDITIONS	MIN	TYP	MAX	UNITS

## Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
  2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
  3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
  4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
  5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
    - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
    - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
  6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
  7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
  8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
  9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
  10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
  11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
  12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.
- (Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.
- (Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

(Rev.4.0-1 November 2017)
