

## Description

The ICS9173B provide the analog PLL circuit blocks to implement a frequency multiplier. Because the device is configured to use an external divider in the PLL clock feedback path, a large divider can be used to result in a large frequency multiplication ratio. This is useful when using a low frequency input clock to generate a high frequency output clock. The ICS9173B contains a phase detector, charge pump, loop filter, and voltage-controlled oscillator (VCO). The ICS674-01 can be used as the external feedback divider.

A common application of the ICS9173B is the implementation of a video genlock circuit. Because of this, the ICS9173B inputs operate on the negative-going clock edge.

The ICS9173B is pin and function compatible to the AV9173-01/15.

## Features

- Phase-detector/VCO circuit block
- Ideal for genlock system
- Reference clock range 12 kHz to 1 MHz for full output clock range
- Output clock range of 1.25 to 75 MHz (-01), and 0.625 to 37.5 MHz (-15). See “Allowable Input Frequency to Output Frequency” table for conditions
- On-chip loop filter
- Single 5 V power supply
- Low power CMOS technology
- 8-pin SOIC package

## Block Diagram

## Pin Assignment

## Pin Descriptions

Pin Number	Pin Name	Pin Type	Pin Description
1	FBIN	Input	Feedback input.
2	IN	Input	Input for reference sync pulse.
3	GND	Power	Ground.
4	FS0	Input	Frequency select 0 input.
5	OE	Input	Output enable.
6	CLK1	Output	Clock output 1.
7	VDD	Power	Power supply (+5 V).
8	CLK2	Output	Clock output 2 (divided-by-2 from Clock 1).

## Allowable Input Frequency to Output Frequency for ICS9173B-01 (in MHz) (ICS9173B-15 outputs run at exactly half of the ICS9173B-01 frequencies)

$f_{IN}$ (kHz)	$f_{OUT}$ for FS = 0		$f_{OUT}$ for FS = 1	
	CLK1 Output	CLK2 Output	CLK1 Output	CLK2 Output
$12 \leq f_{IN} \leq 14$ kHz	44.0 to 75	22.0 to 37.5	11.0 to 18.75	5.5 to 9.375
$14 < f_{IN} \leq 17$ kHz	30.0 to 75	15.0 to 37.5	7.5 to 18.75	3.75 to 9.375
$17 < f_{IN} \leq 30$ kHz	25.0 to 75	12.5 to 37.5	6.25 to 18.75	3.125 to 9.375
$30 < f_{IN} \leq 35$ kHz	15.0 to 75	7.5 to 37.5	3.75 to 18.75	1.875 to 9.375
$35 < f_{IN} \leq 1000$ kHz	10.0 to 75	5.0 to 37.5	2.5 to 18.75	1.25 to 9.375

## Using the ICS9173B in Genlock Applications

Most video sources, such as video cameras, are asynchronous, free-running devices. To digitize video or synchronize one video source to another free-running reference video source, a video “genlock” (generator lock) circuit is required. The ICS9173B integrates the analog blocks which make the task much easier.

In the complete video genlock circuit, the primary function of the ICS9173B is to provide the analog circuitry required to generate the video dot clock within a PLL. This application is illustrated in Figure 1. The input reference signal for this circuit is the horizontal synchronization (H-SYNC) signal. If a composite video reference source is being used, the h-sync pulses must be separated from the composite signal. A video sync separator circuit, such as the National Semiconductor LM1881, can be used for this purpose.

The clock feedback divider shown in Figure 1 is a digital divider used within the PLL to multiply the reference frequency. Its divide ratio establishes how many video dot clock cycles occur per h-sync pulse. For example, if 880 pixel clocks are desired per h-sync pulse, then the divider ratio is set to 880. Hence, together the h-sync frequency and external divider ratio establish the dot clock frequency:

$$f_{OUT} = f_{IN} \times N \text{ where } N \text{ is external divide ratio}$$

Both input pins IN and FBIN respond only to negative-going clock edges of the input signal. The H-SYNC signal must be constant frequency in the 12 kHz to 1 MHz range and stable (low clock jitter) for creation of a stable output clock.

The output hook-ups of the ICS9173B are dictated by the

Figure 1: Typical Application of ICS9173B in a Video Genlock System

desired dot clock frequency. The primary consideration is the internal VCO which operates over a frequency range of 10 MHz to 75 MHz. Because of the selectable VCO output divider and the additional divider on output CLK2, four distinct output frequency ranges can be achieved. The following Table lists these ranges and the corresponding device configuration.

FS0 State	Output Used	Frequency/Range ICS9173B-01	Frequency/Range ICS9173B-15
0	CLK1	10 to 75 MHz	5 to 37.5 MHz
0	CLK2	5 to 37.5 MHz	2.5 to 18.75 MHz
1	CLK1	2.5 to 18.75 MHz	1.25 to 9.375 MHz
1	CLK2	1.25 to 9.375 MHz	0.625 to 4.6875 MHz

Note that both outputs, CLK1 and CLK2, are available during operation even though only one is fed back via the external clock divider.

Pin 5, OE, tristates both CLK1 and CLK2 upon logic low input. This feature can be used to revert dot clock control to the system clock when not in genlock mode (hence, when in genlock mode the system dot clock must be tristated).

When unused, inputs FS0 and OE must be tied to either GND (logic low) or VDD (logic high).

## Absolute Maximum Ratings

Stresses above the ratings listed below can cause permanent damage to the ICS9173B. These ratings, which are standard values for IDT commercially rated parts, are stress ratings only. Functional operation of the device at these or any other conditions above those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods can affect product reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.

Item	Rating
Supply Voltage, VDD	7 V
Storage Temperature	-65 to +150°C
Voltage on I/O Pins referenced to GND	GND - 0.5 V to VDD + 0.5 V
Junction Temperature	125°C
Soldering Temperature	260°C
Power Dissipation	0.5 Watts

## Recommended Operation Conditions

Parameter	Min.	Typ.	Max.	Units
Operating Temperature under Bias	-0		+70	°C
Power Supply Voltage (measured with respect to GND)	+4.75	+5 V	+5.25	V

## DC Electrical Characteristics

Unless stated otherwise, VDD = 5 V ±5%, Ambient Temperature 0 to +70°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Supply Current	IDD	No load, 50 MHz		20	50	mA
Input Low Voltage	V <sub>IH</sub>	VDD = 5 V			0.8	V
Input High Voltage	V <sub>IL</sub>	VDD = 5 V	2.0			V
Input Low Current	I <sub>IL</sub>	VIN = 0V	-5			μA
Input High Current	I <sub>IH</sub>	VIN = VDD	-5		5	μA
Output Low Voltage	V <sub>OL</sub>	I <sub>OL</sub> = 8 mA			0.4	V
Output High Voltage <sup>1</sup>	V <sub>OH1</sub>	I <sub>OH</sub> = -1 mA	VDD-0.4			V
Output High Voltage <sup>1</sup>	V <sub>OH2</sub>	I <sub>OH</sub> = -4 mA	VDD-0.8			V
Output High Voltage <sup>1</sup>	V <sub>OH3</sub>	I <sub>OH</sub> = -8 mA	2.4			V

Notes:

- Duty cycle measured at 1.4 V.
- Input Reference Frequency = 25 kHz, Output Frequency = 25 MHz. Jitter measured between adjacent vertical pixels.
- CLK1 frequency applies for FS = 0. For FS = 1 condition, divide allowable CLK1 range by the factor of 4.

## AC Electrical Characteristics

Unless stated otherwise,  $V_{DD} = 5\text{ V} \pm 5\%$ , Ambient Temperature 0 to  $+70^\circ\text{C}$

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Output Clock Rise Time <sup>1</sup>	$ICLK_r$				10	ns
Output Clock Fall Time <sup>1</sup>	$ICLK_f$				10	ns
Output Rise Time <sup>1</sup>	$t_{r1}$	15 pF load, 0.8 to 2.0V		0.6	1.5	ns
Output Rise Time <sup>1</sup>	$t_{r2}$	15 pF load, 20% to 80% VDD		1.3	3.0	ns
Output Fall Time <sup>1</sup>	$t_{f1}$	15 pF load, 0.8 to 2.0V		0.6	1.5	ns
Output Fall Time <sup>1</sup>	$t_{f2}$	15 pF load, 80% to 20% VDD		0.7	2.0	ns
Output Duty Cycle <sup>1</sup>		15 pF load	40	47	55	%
One-Sigma Jitter <sup>1, 5</sup>	$T_{1S1}$	CLK1 frequency <sup>3</sup> , 25 MHz		120	250	ps
Jitter, Absolute <sup>1, 5</sup>	$T_{ABS1}$	CLK1 frequency <sup>3</sup> , 25 MHz	-400	$\pm 250$	400	ps
One-Sigma Jitter <sup>1, 5</sup>	$T_{1S2}$	CLK1 frequency < 25 MHz			1	%
Jitter, Absolute <sup>1, 5</sup>	$T_{ABS2}$	CLK1 frequency < 25 MHz			2	%
Line-to-Line Jitter <sup>1</sup> , Absolute <sup>2</sup>	$T_{LABS}$			$\pm 4$		ns
Input Frequency <sup>1</sup> , IN or FBIN	$f_{IN}$	see allowable $f_i$ below	12		1000	kHz
CLK1 Frequency, -01 <sup>1, 3, 4</sup>	$f_{CLK1}$	$12 \leq f_{IN} \leq 14\text{ kHz}$	44		75	MHz
		$14 < f_{IN} \leq 17\text{ kHz}$	30		75	
		$17 < f_{IN} \leq 30\text{ kHz}$	25		75	
		$30 < f_{IN} \leq 35\text{ kHz}$	15		75	
		$35 < f_{IN} \leq 1000\text{ kHz}$	10		75	
CLK1 Frequency, -15 <sup>1, 3, 4</sup>	$f_{CLK1}$	$12 \leq f_{IN} \leq 14\text{ kHz}$	22		37.5	MHz
		$14 < f_{IN} \leq 17\text{ kHz}$	15		37.5	
		$17 < f_{IN} \leq 30\text{ kHz}$	12.5		37.5	
		$30 < f_{IN} \leq 35\text{ kHz}$	7.5		37.5	
		$35 < f_{IN} \leq 1000\text{ kHz}$	5		37.5	

Notes:

- Parameter is guaranteed by design and characterization. Not 100% tested in production.
- Input Reference Frequency = 25 kHz, Output Frequency = 25 MHz. Jitter measured between adjacent vertical pixels.
- CLK1 frequency applies for FS = 0. For FS = 1 condition, divide allowable CLK1 range by the factor of 4.
- An Application Brief (AB01) documents the operation of the AV9173 for low input frequencies. This provides guidelines for usable output frequencies and feedback ratios required to use inputs below 25 kHz. By following these guidelines, the ICS9173B will operate down to 12 kHz inputs across temperature, voltage and lot-to-lot variation.
- Jitter values are measured at frequencies  $\geq 25\text{ MHz}$  for IDT9173B-01, for ICS9173B-15, jitter is measured at frequency  $\geq 12.5\text{ MHz}$ .

## Thermal Characteristics

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Thermal Resistance Junction to Ambient	$\theta_{JA}$	Still air		150		°C/W
	$\theta_{JA}$	1 m/s air flow		140		°C/W
	$\theta_{JA}$	3 m/s air flow		120		°C/W
Thermal Resistance Junction to Case	$\theta_{JC}$			40		°C/W
Thermal Resistance Junction to Top of Case	$\Psi_{JT}$	Still air		20		°C/W

## Marking Diagram

Notes:

1. Line 1: truncated part number
2. YYWW is the last two digits of the year and week that the part was assembled.
3. "LOT" denotes the lot number.
4. "L" suffix designates RoHS compliant package.
5. Bottom mark: country of origin.

## Package Outline and Package Dimensions (8-pin SOIC, 150 Mil. Body)

Package dimensions are kept current with JEDEC Publication No. 95

Symbol	Millimeters		Inches	
	Min	Max	Min	Max
A	1.35	1.75	.0532	.0688
A1	0.10	0.25	.0040	.0098
B	0.33	0.51	.013	.020
C	0.19	0.25	.0075	.0098
D	4.80	5.00	.1890	.1968
E	3.80	4.00	.1497	.1574
e	1.27 BASIC		0.050 BASIC	
H	5.80	6.20	.2284	.2440
h	0.25	0.50	.010	.020
L	0.40	1.27	.016	.050
$\alpha$	0°	8°	0°	8°

## Ordering Information

Part / Order Number	Shipping Packaging	Package	Temperature
9173B-01CS08LF	Tubes	8-pin SOIC	0 to +70° C
9173B-01CS08LFT	Tape and Reel	8-pin SOIC	0 to +70° C
9173B-15CS08LF	Tubes	8-pin SOIC	0 to +70° C
9173B-15CS08LFT	Tape and Reel	8-pin SOIC	0 to +70° C

"LF" suffix to the part number denotes Pb-Free configuration, RoHS compliant.

While the information presented herein has been checked for both accuracy and reliability, Integrated Device Technology (IDT) assumes no responsibility for either its use or for the infringement of any patents or other rights of third parties, which would result from its use. No other circuits, patents, or licenses are implied. This product is intended for use in normal commercial applications. Any other applications such as those requiring extended temperature range, high reliability, or other extraordinary environmental requirements are not recommended without additional processing by IDT. ## Revision History

Rev.	Originator	Date	Description of Change
A	R.Willner	09/23/08	New datasheet.
B	RDW	11/12/09	Released to final.
C	RDW	07/29/11	Corrected typographical errors on page 5 for rise/fall times
D	LPL	01/29/13	Added top-side device marking

## Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
  - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
  - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

(Rev.4.0-1 November 2017)
