

Frequency Generator and Integrated Buffers for Celeron & PII/III™

ICS9250-27

Recommended Application:

810/810E and 815 type chipset.

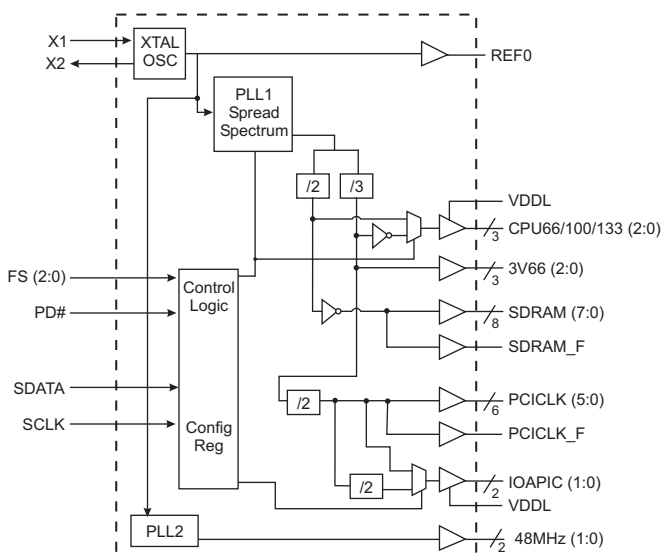

Output Features:

- 3 CPU (2.5V) (up to 133MHz achievable through I²C)
- 9 SDRAM (3.3V) (up to 133MHz achievable through I²C)
- 7 PCI (3.3 V) @ 33.3MHz
- 2 IOAPIC (2.5V) @ 33.3 MHz
- 3 Hublink clocks (3.3 V) @ 66.6 MHz
- 2 (3.3V) @ 48 MHz (Non spread spectrum)
- 1 REF (3.3V) @ 14.318 MHz

Features:

- Supports spread spectrum modulation, 0 to -0.5% down spread.
- I²C support for power management
- Efficient power management scheme through PD#
- Uses external 14.138 MHz crystal
- Alternate frequency selections available through I²C control.

Power Groups

AVDD = Pin 22 Analog power for PLL
 AGND = Pin 23 Analog ground
 VDD48 = Pin 27 Analog power for 48MHz PLL
 GND = Pin 24 Analog ground for 48MHz PLL

General Description

The **ICS9250-27** is a single chip clock solution for 810/810E and 815 type chipset. It provides all necessary clock signals for such a system.

Spread spectrum may be enabled through I²C programming. Spread spectrum typically reduces EMI by 8dB to 10 dB. This simplifies EMI qualification without resorting to board design iterations or costly shielding. The ICS9250-27 employs a proprietary closed loop design, which tightly controls the percentage of spreading over process and temperature variations.

Pin Description

PIN NUMBER	PIN NAME	TYPE	DESCRIPTION
1	FS2	IN	Function Select pin. Determines CPU frequency, all output functionality
	REF0	OUT	3.3V, 14.318MHz reference clock output.
3	X1	IN	Crystal input, has internal load cap (33pF) and feedback resistor from X2
4	X2	OUT	Crystal output, nominally 14.318MHz. Has internal load cap (33pF)
5, 6, 14, 17, 23, 24, 35, 41, 47, 48, 56	GND	PWR	Ground pins for 3.3V supply
9, 8, 7	3V66 (2:0)	OUT	3.3V Fixed 66MHz clock outputs for HUB
2, 10, 11, 21, 22, 27, 33, 38, 44	VDD	PWR	3.3V power supply
12	PCICLK_F	OUT	Free running 3.3V PCI clock output
20, 19, 18, 16, 15, 13	PCICLK (5:0)	OUT	3.3V PCI clock outputs
25	48MHz_0	OUT	3.3V Fixed 48MHz clock outputs for USB
26	48MHz_1	OUT	3.3V fixed 48MHz clock output. Stronger output for graphics/video interface (minimum 1V/ns edge rate)
29, 28	FS (1:0)	IN	Function Select pins. Determines CPU frequency, all output functionality. Please refer to Functionality table on page 1
30	SDATA	I/O	Data pin for I ² C circuitry 5V tolerant
31	SCLK	IN	Clock pin of I ² C circuitry 5V tolerant
32	PD#	IN	Asynchronous active low input pin used to power down the device into a low power state. The internal clocks are disabled and the VCO and the crystal are stopped. The latency of the power down will not be greater than 3ms.
36, 37, 39, 40, 42, 43, 45, 46	SDRAM (7:0)	OUT	3.3V output running 100MHz. All SDRAM outputs can be turned off through I ² C
34	SDRAM_F	OUT	3.3V free running 100MHz SDRAM, cannot be turned off through I ² C
49, 50, 52	CPUCLK (2:0)	OUT	2.5V Host bus clock output. 66MHz, 100MHz or 133MHz depending on FS pins.
51, 53	VDDL	PWR	2.5V power supply for CPU & IOAPIC
54, 55	IOAPIC (1:0)	OUT	2.5V clock outputs running at 33.3MHz.

Power Down Waveform

Note

1. After PD# is sampled active (Low) for 2 consecutive rising edges of CPUCLKs, all the output clocks are driven Low on their next High to Low transition.
2. Power-up latency <3ms.
3. Waveform shown for 100MHz

Note 1: For system operation, the BSEL lines of the CPU will program FS0, FS2 for the appropriate CPU speed, always with SDRAM = 100MHz. After BIOS verifies the SDRAM is PC133 speed, then bit 0 can be written from the default 0 to 1 to change the SDRAM output frequency from 100MHz to 133MHz. This will only change if the CPU is at the 133MHz FSB speed as shown in this table. The CPU, 3v66, PCI, and IOAPIC clocks will be glitch free during this transition, and only SDRAM will change.

Note 2: "ICS RESERVED BITS" must be written as "0".

Note3: Undefined bits can be written either as "1 or 0"

General I²C serial interface information

The information in this section assumes familiarity with I²C programming.

How to Write:

- Controller (host) sends a start bit.
- Controller (host) sends the write address D2_(H)
- ICS clock will *acknowledge*
- Controller (host) sends a dummy command code
- ICS clock will *acknowledge*
- Controller (host) sends a dummy byte count
- ICS clock will *acknowledge*
- Controller (host) starts sending first byte (Byte 0) through byte 5
- ICS clock will *acknowledge* each byte *one at a time*.

How to Write:	
Controller (Host)	ICS (Slave/Receiver)

How to Read:

- Controller (host) will send start bit.
- Controller (host) sends the read address D3_(H)
- ICS clock will *acknowledge*
- ICS clock will send the *byte count*
- Controller (host) acknowledges
- ICS clock sends first byte (*Byte 0*) through *byte 5*
- Controller (host) will need to acknowledge each byte
- Controller (host) will send a stop bit

How to Read:

Notes:

1. The ICS clock generator is a slave/receiver, I²C component. It can read back the data stored in the latches for verification. **Read-Back will support Intel PIIX4 "Block-Read" protocol.**
2. The data transfer rate supported by this clock generator is 100K bits/sec or less (standard mode)
3. The input is operating at 3.3V logic levels.
4. The data byte format is 8 bit bytes.
5. To simplify the clock generator I²C interface, the protocol is set to use only "**Block-Writes**" from the controller. The bytes must be accessed in sequential order from lowest to highest byte with the ability to stop after any complete byte has been transferred. The Command code and Byte count shown above must be sent, but the data is ignored for those two bytes. The data is loaded until a Stop sequence is issued.
6. At power-on, all registers are set to a default condition, as shown.

XXXX y F - PPP LF - T

- XXXX — Device Type (consists of 3 to 7 digit numbers)
- y — Revision Designator (will not correlate with datasheet revision)
- F — Package Type
F=SSOP
- PPP — Pattern Number (2 or 3 digit number for parts with ROM code patterns)
- LF — RoHS Compliant (Optional)
- T — Designation for tape and reel packaging

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
 2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
 3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
 4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
 5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
 - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
 - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
 6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
 7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
 8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
 9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
 10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
 11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
 12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.
- (Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.
- (Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
