

## Description

The IDT5P50911/2/3/4 is a family of 1.8V/2.5V/3.3V low power, spread spectrum clock generators capable of reducing EMI radiation from an input clock. Spread spectrum technique is capable of reducing the harmonic frequency amplitude peaks by several dB.

## Ordering Information

### Output Frequency

- 5 to 15 MHz - 5P50911NBI/5P50911DVG1
- 10 to 30 MHz - 5P50912NBI/5P50912DVG1
- 20 to 60 MHz - 5P50913NBI/5P50913DVG1
- 40 to 120 MHz - 5P50914NBI/5P50914DVG1

## Features

- 8-pin DFN package (2x2mm)
- 8-pin MSOP package (3x4.9mm)
- Provides a spread spectrum output clock
- Crystal input frequency range of 10 to 30 MHz
- Output frequency range of 10 to 120 MHz
- Center and down spread
- Peak reduction by 8 dB to 16 dB typical on 3rd through 19th odd harmonics
- Low EMI feature can be disabled
- Operating voltage of 1.8 V, 2.5 or 3.3V
- RoHS 6 compliant package

## Spread Modulation Frequency Table

Part Number	Output Multiply	Input (MHz)	Modulation (kHz)	Input (MHz)	Modulation (kHz)	Modulation Frequency (kHz)
5P50911	1/2x	10	27	30	81	Input frequency *27/10000
5P50912	1x					
5P50913	2x					
5P50914	4x					

## Block Diagram

## Pin Assignment

8-pin DFN  
8-pin MSOP

## Spread Direction and Percentage Select Table

S1	S0	Spread Direction	Spread Percentage
0	0	OFF	--
0	1	Center	$\pm 0.5$
1	0	Center	$\pm 1.5$
1	1	Down	-0.5

## Pin Description

Pin Number	Pin Name	Pin Type	Pin Description
1	X1	XI	Crystal input. Connect this pin to a crystal.
2	VDD	Power	Voltage supply. Connect to 1.8 V $\pm 0.1$ V, 2.5 V $\pm 10\%$ or 3.3 V $\pm 10\%$ ,
3	OE	Input	Output enable. Tri-states CLK output when low. Internal pull-up.
4	S0	Input	Function select 0 input. Selects spread amount and direction per table above. Internal pull-down resistor.
5	S1	Input	Function select 1 input. Selects spread amount and direction per table above. Internal pull-down resistor.
6	CLKOUT	Output	Clock output. Weak pull-down when OE low.
7	GND	Power	Connect to ground.
8	X2	XO	Crystal output. Connect this pin to a crystal.

## External Components

### Decoupling Capacitor

As with any high-performance mixed-signal IC, the IDT5P50911/2/3/4 must be isolated from system power supply noise to perform optimally.

A decoupling capacitor of 0.01 $\mu$ F must be connected between each VDD and the PCB ground plane.

### Series Termination Resistor

Clock output traces over one inch should use series termination. To series terminate a 50 $\Omega$  trace (a commonly used trace impedance), place a 33 $\Omega$  resistor in series with the clock line, as close to the clock output pin as possible. The nominal impedance of the clock output is 20 $\Omega$ .

### Crystal Load Capacitors

The device crystal connections should include pads for small capacitors from X1 to ground and from X2 to ground. These capacitors are used to adjust the stray capacitance of the board to match the nominally required crystal load capacitance. Because load capacitance can only be increased in this trimming process, it is important to keep stray capacitance to a minimum by using very short PCB traces (and no vias) between the crystal and device. Crystal capacitors, if needed, must be connected from each of the pins X1 and X2 to ground.

The value (in pF) of these crystal caps should equal  $(C_L - 12 \text{ pF})^2$ . In this equation,  $C_L$  = crystal load capacitance in pF. Example: For a crystal with a 16 pF load capacitance, each crystal capacitor would be 8 pF  $[(16-12) \times 2 = 8]$ .

### PCB Layout Recommendations

For optimum device performance and lowest output phase noise, the following guidelines should be observed.

1) The 0.01 $\mu$ F decoupling capacitors should be mounted on the component side of the board as close to the VDD pin as possible. No vias should be used between the decoupling capacitors and VDD pins. The PCB trace to VDD pins should be kept as short as possible, as should the PCB trace to the ground via.

2) To minimize EMI, the 33 $\Omega$  series termination resistor (if needed) should be placed close to the clock output.

3) An optimum layout is one with all components on the same side of the board, minimizing vias through other signal layers. Other signal traces should be routed away from the IDT5P50911/2/3/4. This includes signal traces just underneath the device, or on layers adjacent to the ground plane layer used by the device.

### Spread Spectrum Profile

The IDT5P50911/2/3/4 is a low EMI clock generator using an optimized frequency slew rate algorithm to facilitate down stream tracking of zero delay buffers and other PLL devices.

The modulation rate is directly relate to the input crystal frequency.

For input frequency ICLK, then use the modulation frequency indicated for the part below.

$$\text{Modulation Frequency} = \text{Input Frequency}/10000$$

Ex. Input Frequency = 20 MHz

$$\text{Modulation Frequency} = 20 \text{ MHz}/10000 = 2 \text{ kHz}$$

## Absolute Maximum Ratings

Stresses above the ratings listed below can cause permanent damage to the IDT5P50911/2/3/4. These ratings, which are standard values for IDT commercially rated parts, are stress ratings only. Functional operation of the device at these or any other conditions above those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods can affect product reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.

Item	Rating
Supply Voltage, VDD	-0.5 V to 7.0 V
All Inputs	-0.5 V to VDD +0.5 V
Ambient Operating Temperature	-40 to +85°C
Storage Temperature	-50 to +150°C
Junction Temperature	125°C
Soldering Temperature	260°C

## Recommended Operation Conditions

Parameter	Min.	Typ.	Max.	Units
Ambient Operating Temperature	-40		+85	°C
Power Supply Voltage VDD (measured in respect to GND)	+1.7	+1.8	+1.9	V
	+2.25	+2.5	+2.75	V
	+2.97	+3.3	+3.63	V

## DC Electrical Characteristics

Unless stated otherwise, **VDD = 1.8 V ±0.1 V**. Ambient Temperature -40 to +85°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		1.7	1.8	1.9	V
Input High Voltage	V <sub>IH</sub>	ICLK, S2:S0	VDD x 0.8		VDD + 0.3	V
Input Low Voltage	V <sub>IL</sub>	ICLK, S2:S0	GND		VDD x 0.2	V
Output High Voltage	V <sub>OH</sub>	I <sub>OH</sub> = -18 mA	VDD x 0.9	VDD		V
Output Low Voltage	V <sub>OL</sub>	I <sub>OL</sub> = 18 mA		GND	VDD x 0.1	V
IDD		No load		TBD		
Input Capacitance				5		pF
Load Capacitance				5		pF
Internal Pull-up Resistor	R <sub>PU</sub>	OE		400	520	kΩ
Internal Pull-down Resistor	R <sub>PD</sub>	S1:S0, CLKOUT		400	520	kΩ

Unless stated otherwise, **VDD = 2.5 V ±10%**. Ambient Temperature -40 to +85°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		2.25	2.5	2.75	V
Input High Voltage	V <sub>IH</sub>	ICLK, S2:S0	VDD x 0.8		VDD + 0.3	V
Input Low Voltage	V <sub>IL</sub>	ICLK, S2:S0	GND		VDD x 0.2	V
Output High Voltage	V <sub>OH</sub>	I <sub>OH</sub> = -25 mA	VDD x 0.9	VDD		V
Output Low Voltage	V <sub>OL</sub>	I <sub>OL</sub> = 25 mA		GND	VDD x 0.1	V
IDD		No load		TBD		
Input Capacitance				5		pF
Load Capacitance				5		pF
Internal Pull-up Resistor	R <sub>PU</sub>	OE		300	390	kΩ
Internal Pull-down Resistor	R <sub>PD</sub>	S1:S0, CLKOUT		300	390	kΩ

Unless stated otherwise, **VDD = 3.3 V ±10%**. Ambient Temperature -40 to +85°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		2.97	3.3	3.63	V
Input High Voltage	V <sub>IH</sub>	ICLK, S2:S0	VDD x 0.8		VDD + 0.3	V
Input Low Voltage	V <sub>IL</sub>	ICLK, S2:S0	GND		VDD x 0.2	V
Output High Voltage	V <sub>OH</sub>	I <sub>OH</sub> = -33 mA	VDD x 0.9	VDD		V
Output Low Voltage	V <sub>OL</sub>	I <sub>OL</sub> = 33 mA		GND	VDD x 0.1	V
IDD		No load		TBD		
Input Capacitance				5		pF

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Load Capacitance				5		pF
Internal Pull-up Resistor	R <sub>PU</sub>	OE		200	260	kΩ
Internal Pull-down Resistor	R <sub>PD</sub>	S1:S0, CLKOUT		200	260	kΩ

## AC Electrical Characteristics

Unless stated otherwise, **VDD = 1.8 V ±0.1 V, 2.5 V ±10% or 3.3 V ±10%**. Ambient Temperature -40 to +85°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Output Clock Duty Cycle			45	50	55	%
Output Rise Time	t <sub>OR</sub>	20% to 80%, Note 1		1.2		ns
Output Fall Time	t <sub>OF</sub>	80% to 20%, Note 1		1.2		ns
Spread Spectrum Modulation Rate		5 to 15 MHz output (IDT5P50911)	27		81	kHz
		10 to 30 MHz output (IDT5P50912)	27		81	kHz
		20 to 60 MHz output (IDT5P50913)	27		81	kHz
		40 to 120 MHz output (IDT5P50914)	27		81	kHz
Jitter Cycle to Cycle		Cycle to cycle jitter		150		ps
Output Settling Time		Note 2			3.0	ms

Note 1: Measured with 5 pF load

Note 2: Time between VDD rising above minimum operating voltage and stable frequency output

### Package Outline and Package Dimensions (8-pin DFN 2x2mm, 0.5mm pitch)

Package dimensions are kept current with JEDEC Publication No. 95,

Symbol	Millimeters	
	Min	Max
A	0.80	1.00
A1	0	0.05
A3	0.20 Reference	
b	0.20	0.30
N	8

N <sub>E</sub>	0	
D	2.00 BASIC	
E	2.00 BASIC	
e	0.50 BASIC	
D2	1.05	1.25
E2	0.45	0.65
L	0.20	0.40
aaa	0.15	
bbb	0.10	
ccc	0.10	

### Marking Diagram (8DFN)

Notes:

1. Line 1: truncated part number (format to be the same for 912, 913, and 914 devices).
2. "G" designates Pb (lead) free package.
3. "I" denotes industrial temperature range.
4. "YYWW" is the last two digits of the year and week that the part was assembled.
5. "\$" is the mark code.
6. Bottom marking: country of origin.

### Package Outline and Package Dimensions (8-pin MSOP, 3.00 mm Body)

Package dimensions are kept current with JEDEC Publication No. 95

Symbol	Millimeters		Inches*	
	Min	Max	Min	Max
A	--	1.10	--	0.043
A1	0	0.15	0	0.006
A2	0.79	0.97	0.031	0.038
b	0.22	0.38	0.008	0.015
C	0.08	0.23	0.003	0.009
D	3.00 BASIC		0.118 BASIC	
E	4.90 BASIC		0.193 BASIC	
E1	3.00 BASIC		0.118 BASIC	
e	0.65 Basic		0.0256 Basic	
L	0.40	0.80	0.016	0.032
$\alpha$	0°	8°	0°	8°
aaa	-	0.10	-	0.004

## Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
  - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
  - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

(Rev.4.0-1 November 2017)
