

Description

The ICSLV810 is a low skew 1.5 V to 2.5 V, 1:10 fanout buffer. This device is specifically designed for data communications clock management. The large fanout from a single input line reduces loading on the input clock. The TTL level outputs reduce noise levels on the part. Typical applications are clock and signal distribution.

Features

- Packaged in 20-pin QSOP/SSOP
- Split 1:10 fanout Buffer
- Maximum skew between outputs of different packages 0.75 ns
- Max propagation delay of 3.8 ns
- Operating voltage of 1.5 V to 2.5 V on Bank A
- Operating voltage of 1.5 V to 2.5 V on Banks B and C
- Advanced, low power, CMOS process
- Industrial temperature range -40° C to +85° C
- 3.3 V tolerant input when VDDA=2.5 V
- Pb (lead) free packaging

Pin Assignment

CLKIN	1	20	VDDB
GND	2	19	CLK 10
CLK 1	3	18	CLK 9
VDDA	4	17	GND
CLK 2	5	16	CLK 8
GND	6	15	VDDC
CLK 3	7	14	CLK 7
VDDA	8	13	GND
CLK 4	9	12	CLK 6
GND	10	11	CLK 5

20 pin (150mil) SSOP

Pin Descriptions

Pin Number	Pin Name	Pin Type	Pin Description
1	CLKIN	Input	Clock input.
2	GND	Power	Connect to ground.
3	CLK1	Output	Clock output.
4	VDDA	Power	Connect to +1.5 - +2.5 V.
5	CLK2	Output	Clock output.
6	GND	Power	Connect to ground.
7	CLK3	Output	Clock output.
8	VDDA	Power	Connect to +1.5 - +2.5 V.
9	CLK4	Output	Clock output.
10	GND	Power	Connect to ground.
11	CLK5	Output	Clock output.
12	CLK6	Output	Clock output.
13	GND	Power	Connect to ground.
14	CLK7	Output	Clock output.
15	VDDC	Power	Connect to +1.5 - 2.5 V.
16	CLK8	Output	Clock output.
17	GND	Power	Connect to ground.
18	CLK9	Output	Clock output.
19	CLK10	Output	Clock output.
20	VDDB	Power	Connect to +1.5 - 2.5 V.

External Components

The ICSLV810 requires a minimum number of external components for proper operation.

Decoupling Capacitors

Decoupling capacitors of 0.01 μ F must be connected between VDD and GND, as close to these pins as possible. For optimum device performance, the decoupling capacitors should be mounted on the component side of the PCB. Avoid the use of vias in the decoupling circuit.

Series Termination Resistor

When the PCB trace between the clock outputs and the loads are over 1 inch, series termination should be used. To series terminate a 50 Ω trace (a commonly used trace impedance) place a 33 Ω resistor in series with the clock line,

as close to the clock output pin as possible. The nominal impedance of the clock output is 20 Ω .

PCB Layout Recommendations

For optimum device performance and lowest output phase noise, the following guidelines should be observed.

- 1) The 0.01 μ F decoupling capacitors should be mounted on the component side of the board as close to the VDD pins as possible. No vias should be used between the decoupling capacitors and VDD pins. The PCB trace to VDD pin should be kept as short as possible, as should the PCB trace to the ground via.
- 2) To minimize EMI the 33 Ω series termination resistor, if needed, should be placed close to the clock output.

Absolute Maximum Ratings

Stresses above the ratings listed below can cause permanent damage to the ICSLV810. These ratings, which are standard values for ICS commercially rated parts, are stress ratings only. Functional operation of the device at these or any other conditions above those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods can affect product reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.

Item	Rating
Supply Voltage, VDD MAX	7 V
All Inputs and Outputs	-0.5 V to VDDA + 1.2 V
Ambient Operating Temperature	-40 to +85° C
Storage Temperature	-65 to +150° C
Junction Temperature	125° C
Soldering Temperature	260° C

Recommended Operation Conditions

Parameter	Min.	Typ.	Max.	Units
Ambient Operating Temperature	-40		+85	°C
Power Supply Voltage (measured with respect to GND), VDDA	1.425		2.625	V
Power Supply Voltage (measured with respect to GND), VDDB	1.425		2.625	V
Power Supply Voltage (measured with respect to GND), VDDC	1.425		2.625	V

DC Electrical Characteristics—CLKIN and Bank A

VDDA = 2.5 V, Ambient Temperature -40° C to +85° C

Parameter	Symbol	Conditions		Min.	Typ.	Max.	Units
Operating Voltage	VDDA			1.425		2.625	V
Quiescent Power Supply Current	IDDA	No Load F = 40 MHz			15		mA
Short Circuit Current	I _{OS}	CLK 1 - 5			±80		mA
Input High Voltage, CLKIN	V _{IH}	Guaranteed Logic Level High		1.6			V
Input Low Voltage, CLKIN	V _{IL}	Guaranteed Logic Level Low				0.8	V
Output High Voltage	V _{OH}	V _{IN} = V _{IH} or V _{IL}	I _{OH} = -7 mA	1.8			V
Output Low Voltage	V _{OL}	V _{IN} = V _{IH} or V _{IL}	I _{OL} = 12 mA			0.4	V
Input High Current	I _{IH}	VDD = max	V _{IN} = 2.4 V			1	μA
Input Low Current	I _{IL}	VDD = max	V _{IN} = 0.5 V			-1	μA
Input High Current	I _I	VDD = max	V _{IN} = VDD (max)			20	μA
Input Capacitance	C _{IN}	V _{IN} = 0V, Note1			5	6.0	pF
Output Capacitance	C _{OUT}	V _{OUT} = 0V, Note1			5.5	8.0	pF

Note1: This parameter is not tested, guaranteed by design.

DC Electrical Characteristics—Bank B

VDDB = 2.5 V, Ambient Temperature -40° C to +85° C, unless otherwise noted

Parameter	Symbol	Conditions		Min.	Typ.	Max.	Units
Operating Voltage	VDDB			1.425		2.625	V
Quiescent Power Supply Current	IDDB	VDDB = 2.5 V No Load F = 40 MHz			7		mA
		VDDB = 1.5 V No Load F = 40 MHz			3		mA
Short Circuit Current	I _{OS}	VDDB = 1.5 V	CLK8-10		±35		mA
		VDDB = 2.5 V	CLK8-10		±80		mA

Parameter	Symbol	Conditions		Min.	Typ.	Max.	Units
Output High Voltage	V _{OH}	V _{DDB} = 1.5 V V _{IN} = V _{IH} or V _{IL}	I _{OH} = -7 mA	1.1			V
		V _{DDB} = 2.5 V V _{IN} = V _{IH} or V _{IL}	I _{OH} = -7 mA	1.8			V
Output Low Voltage	V _{OL}	V _{DDB} = 1.5 V V _{IN} = V _{IH} or V _{IL}	I _{OL} = 12 mA			0.42	V
		V _{DDB} = 2.5 V V _{IN} = V _{IH} or V _{IL}	I _{OL} = 12 mA			0.4	V
Input High Current	I _{IH}	V _{DDB} = max				1	μA
Input Low Current	I _{IL}	V _{DDB} = max				-1	μA
Input High Current	I _I	V _{DDB} = max, V _{IN} = V _{DD} (max)				20	μA
Input Capacitance	C _{IN}	V _{IN} = 0V, Note1			5	6.0	pF
Output Capacitance	C _{OUT}	V _{OUT} = 0V, Note 1			5.5	8.0	pF

Note1: This parameter is not tested, guaranteed by design.

DC Electrical Characteristics—Bank C

V_{DDC} = 2.5 V, Ambient Temperature -40° C to +85° C, unless otherwise noted

Parameter	Symbol	Conditions		Min.	Typ.	Max.	Units
Operating Voltage	V _{DDC}			1.425		2.625	V
Quiescent Power Supply Current	I _{DDC}	V _{DDC} = 2.5 V No Load F = 40 MHz			3		mA
		V _{DDC} = 1.5 V No Load F = 40 MHz			2		mA
Short Circuit Current	I _{OS}	V _{DDC} = 1.5 V	CLK6-7		±35		mA
		V _{DDC} = 2.5 V	CLK6-7		±80		mA
Output High Voltage	V _{OH}	V _{DDC} = 1.5 V V _{IN} = V _{IH} or V _{IL}	I _{OH} = -7 mA	1.1			V
		V _{DDC} = 2.5 V V _{IN} = V _{IH} or V _{IL}	I _{OH} = -7 mA	1.8			V
Output Low Voltage	V _{OL}	V _{DDC} = 1.5 V V _{IN} = V _{IH} or V _{IL}	I _{OL} = 12 mA			0.42	V
		V _{DDC} = 2.5 V V _{IN} = V _{IH} or V _{IL}	I _{OL} = 12 mA			0.4	V
Input High Current	I _{IH}	V _{DDC} = max				1	μA
Input Low Current	I _{IL}	V _{DDC} = max				-1	μA

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Input High Current	I_{IH}	$V_{DDC} = \text{max}$, $V_{IN} = V_{DD} (\text{max})$			20	μA
Input Capacitance	C_{IN}	$V_{IN} = 0\text{V}$, Note1		5	6.0	pF
Output Capacitance	C_{OUT}	$V_{OUT} = 0\text{V}$, Note 1		5.5	8.0	pF

Note1: This parameter is not tested, guaranteed by design.

AC Electrical Characteristics—Bank A

$V_{DDA} = 2.5\text{ V}$, Ambient Temperature -40° C to $+85^{\circ}\text{ C}$

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units

Revision History

Rev.	Originator	Date	Description of Change
A	P.Griffith	03/25/05	New device/datasheet.
B	P.Griffith	05/02/05	Released from Preliminary to final; changed Short Circuit Current parameter in 2.5 V DC Char table to ± 80 mA; changed Short Circuit Current parameter in 1.5 V DC Char table to ± 35 mA
C	P.Griffith	05/12/05	Added bullet in "Features" for operating voltage of 2.5 V on Bank A and specified that operating voltages of 1.5 and 2.5 V are on Banks B and C; changed block diagram input and pin 1 from IN to CLKIN; removed +1.5 V spec from pin 4 and pin 8 descriptions; added "VDDA + 1.2 V" to "All Inputs and Outputs" section of Absolute Maximum Ratings; added min and max values for Banks A, B, and C "Power Supply Voltage" in Recommended Operating Conditions; expanded DC Electrical Char tables in to include a separate table for Banks A, B, and C; expanded AC Electrical Char tables in to include a separate table for Banks A, B, and C;
D	P.Griffith	06/21/05	Added 209 mil 20-pin SSOP package and ordering info.
E	K. Beckmeyer	07/27/05	Specified operating voltage on Bank A from 1.5V to 2.5V; Added figures 4 and 5 on page 10 to explain Pulse Skew and Part-to-Part Skew; Changed Output Frequency Max Specification to 133MHz in AC Electrical Char tables for Banks A, B, and C; Added Duty Cycle Spec for VDD = 1.5V in AC Electrical Char tables for Banks A, B, C; Changed CLK conditions in DC Electrical Char tables on Banks B and C; removed SOIC package.
F	K. Beckmeyer	10/13/05	Added "LF" packaging and ordering info to both "R" and "F" packages.
G		12/17/09	Added EOL note for non-green parts.
H		05/13/10	Removed EOL note and non-green orderables.

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
 - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
 - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
