

The MPC9824 is a PLL based clock generator specifically designed for Freescale Microprocessor and Microcontroller applications including the PowerPC and PowerQUICC. This device generates the microprocessor input clock and other microprocessor system and bus clocks at any one of eight output frequencies. These frequencies include 33, 50, 66, 100, 125, 133.33, 166.66 and 200 MHz. The device offers six low skew clock outputs plus the three reference outputs. The clock input reference is 25 MHz and may be derived from an external source or by the addition of a 25 MHz crystal to the on-chip crystal oscillator. The extended temperature range of the MPC9824 supports telecommunication and networking requirements.

Features

- 6 LVCMOS outputs for processor and other system circuitry
- 3 Buffered 25 MHz reference clock outputs
- Crystal oscillator or external reference input
- 25 MHz Input reference frequency
- Selectable output frequencies = 33.33, 50, 66.66, 100, 125, 133.33, 166.66, or 200 MHz
- Low cycle-to-cycle and period jitter
- Package = 32 lead LQFP
- 3.3 V supply
- Supports computing, networking, telecommunications applications
- Ambient temperature range -40°C to +85°C
- **For functional replacement use 8T49N285A**

Functional Description

The MPC9824 uses a PLL with a 25 MHz input reference frequency to generate a single bank of 6 configurable LVCMOS output clocks. The output frequency of this bank is configurable by three FSEL pins. The 25 MHz reference may be either an external frequency source or a 25 MHz crystal. The 25 MHz crystal is directly connected to the XTAL_IN and XTAL_OUT pins with no additional components required. An external reference may be applied to the XTAL_IN pin with the XTAL_OUT pin left floating. The input reference, whether provided by a crystal or an external input is also directly buffered to a second bank of 3 LVCMOS outputs. These outputs may be used as the clock source for processor I/O applications such as an Ethernet PHY.

The MPC9824 is packaged in a 32 lead LQFP package.

Figure 1. MPC9824 Logic Diagram

Table 1. Pin configuration

Pin	I/O	Type	Function
QA0, QA1, QA2 QA3, QA4, QA5	Output	LVC MOS	Clock Outputs
QREF0, QREF1, QREF2	Output	LVC MOS	Reference Output (25 MHz)
XTAL_IN	Input	LVC MOS	Crystal Oscillator Input Pin
XTAL_OUT	Output	LVC MOS	Crystal Oscillator Output Pin
REF_IN	Input	LVC MOS	External Reference Input (internal pull-down)
SEL_XTAL	Input	LVC MOS	Selects between XTAL or External Source (internal pull-up)
FSEL0 FSEL1 FSEL2	Input	LVC MOS	Configures Bank A Clock Output Frequency (internal pull-up)
$\overline{\text{BYPASS}}$	Input	LVC MOS	Test Mode to Bypass PLL (active low, internal pull-up)
$\overline{\text{MR/OE}}$	Input	LVC MOS	Master Reset (internal pull-down)
V_{DDA}			Analog Supply, An external filter is recommended
V_{DD}	—	—	3.3 V Supply
GND	—	—	Ground

Table 2. FSEL Function Table

FSEL0	FSEL1	FSEL2	VCO Frequency	Output Frequency
0	0	0	400	33.33 MHz
0	0	1	400	66.66 MHz
0	1	0	400	50 MHz
0	1	1	400	100 MHz
1	0	0	500	125 MHz
1	0	1	500	166.66 MHz
1	1	0	400	133.33 MHz
1	1	1	400	200 MHz

Table 3. Function Table

Control	0	1

MPC9824 OPERATION

Crystal Oscillator

The MPC9824 features a fully integrated Pierce oscillator to minimize system implementation costs. The MPC9824 may be operated with a 25 MHz crystal without other components. For operation without external components, the crystal selection should be of a 25 MHz parallel resonant type with a load specification of $CL = 10\text{ pF}$. See Table 4 for complete crystal specifications.

If more precise frequency control is desired, the addition of capacitors from each of the XTAL_IN and XTAL_OUT pins to ground may be used to trim the frequency as shown in Figure 3. In this case the recommended crystal should have a $CL = 18\text{ pF}$.

In either case the crystal should be located as close to the MPC9824 XTAL_IN and XTAL_OUT pins as possible to minimize any board level parasitic capacitance.

Table 4. Crystal Specifications

Parameter	Value	Value (with trim caps)
Crystal Cut	Fundamental AT Cut	Fundamental AT Cut
Resonance	Parallel Resonance	Parallel Resonance
Shunt Capacitance (C_0)	5–7 pF	5–7 pF
Load Capacitance (C_L)	18 pF	18 pF
Equivalent Series Resistance (ESR)	20–50 Ω	20–50 Ω

Figure 3 Crystal with Trim Caps

*NOTE: These are recommended values and are subject to change due to specific crystal parameter and board layout. Refer to ICS Application Notes for further information on the crystal selection.

Power-Supply Bypassing

The MPC9824 should have all V_{DD} pins bypassed with $0.01\text{ }\mu\text{F}$ capacitors and a minimum of one $1.0\text{ }\mu\text{F}$ capacitor for the overall package. All capacitors should be located as close to the package as possible.

An external RC filter from V_{DD} to V_{DDA} is recommended as shown in Figure 4.

Figure 4. Power Supply Filter

Table 5. Absolute Maximum Ratings⁽¹⁾

Symbol	Characteristics	Min	Max	Unit	Condition
V _{DD}	Supply Voltage	-0.3	3.8	V	
I _{IN}	DC Input Current		±20	mA	
I _{OUT}	DC Output Current		±75	mA	
T _S	Storage Temperature	-65	125	°C	

1. Absolute maximum continuous ratings are those maximum values beyond which damage to the device may occur. Exposure to these conditions or conditions beyond those indicated may adversely affect device reliability. Functional operation at absolute-maximum-rated conditions is not implied.

Table 6. General Specifications

Symbol	Characteristics	Min	Typ	Max	Unit	Condition
V _{TT}	Output Termination Voltage		V _{DD} ÷ 2		V	
MM	ESD Protection (Machine model)	200			V	
HBM	ESD Protection (Human body model)	2000			V	
LU	Latch-Up Immunity	200			mA	
C _{IN}	Input Capacitance		4		pF	Inputs
T _C	Ambient Temperature	-40		85	°C	
C _{PD}	Power Dissipation Capacitance		10		pF	Per output
R _{PU} , R _{PD}	Pull-up/Pull-down Resistance			75	KΩ	

Table 7. DC Characteristics (V_{DD} = 3.3 V ± 5%, T_A = -40°C to +85°C)

Symbol	Characteristics	Min	Typ	Max	Unit	Condition
V _{IH}	Input High Voltage (xtal_in)	2.4		V _{DD} + 0.3	V	Input threshold = V _{DD} /2
V _{IH}	Input High Voltage	2.0		V _{DD} + 0.3	V	
V _{IL}	Input Low Voltage			0.8	V	LVC MOS
I _{IN}	Input Current ⁽¹⁾			±150	μA	V _{IN} = V _{DD} or GND
V _{OH}	Output High Voltage	2.4			V	I _{OH} = -12 mA
V _{OL}	Output Low Voltage			0.4	V	I _{OL} = 12 mA
Z _{OUT}	Output Impedance		14		Ω	
I _{DD}	Maximum Quiescent Supply Current			3.5	mA	V _{DD} pins, output not loaded
I _{DDA}	Maximum Quiescent Supply Current			6.5	mA	V _{DDA} pins, output not loaded

1. Inputs have pull-down or pull-down resistors affecting the input current.

Table 8. AC Characteristics ($V_{DD} = 3.3\text{ V} \pm 5\%$, $T_A = -40^\circ\text{C}$ to $+85^\circ\text{C}$) ⁽¹⁾

PACKAGE DIMENSIONS

NOTES:

1. DIMENSIONS ARE IN MILLIMETERS.
2. INTERPRET DIMENSIONS AND TOLERANCES PER ASME Y14.5-1994.
3. DATUMS A, B, AND D TO BE DETERMINED AT DATUM PLANE H.
4. DIMENSIONS TO BE DETERMINED AT SEATING PLANE DATUM C.
5. DIMENSION DOES NOT INCLUDE DAMBAR PROTRUSION. ALLOWABLE DAMBAR PROTRUSION SHALL NOT CAUSE THE LEAD WIDTH TO EXCEED THE MAXIMUM DIMENSION BY MORE THAN 0.08 MM. DAMBAR CANNOT BE LOCATED ON THE LOWER RADIUS OR THE FOOT. MINIMUM SPACE BETWEEN PROTRUSION AND ADJACENT LEAD OR PROTRUSION: 0.07 MM.
6. DIMENSIONS DO NOT INCLUDE MOLD PROTRUSION. ALLOWABLE PROTRUSION IS 0.25 MM PER SIDE. DIMENSIONS ARE MAXIMUM PLASTIC BODY SIZE DIMENSIONS INCLUDING MOLD MISMATCH.
7. EXACT SHAPE OF EACH CORNER IS OPTIONAL.
8. THESE DIMENSIONS APPLY TO THE FLAT SECTION OF THE LEAD BETWEEN 0.1 MM AND 0.25 MM FROM THE LEAD TIP.

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
 - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
 - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
