

Tsi384™ PCIe® to PCI/X Bridge Product Brief

Device Overview

The IDT Tsi384 is a high-performance bus bridge that connects the PCI Express (PCIe) protocol to the PCI and PCI-X bus standards.

The Tsi384's PCIe Interface has superior performance and supports 1, 2, or 4 lanes. This enables the bridge to offer exceptional throughput performance of up to 1 GBps.

The device's PCI/X Interface can operate up to 133 MHz in PCI-X mode, or up to 66 MHz in PCI mode. This interface offers designers extensive flexibility by supporting three types of addressing modes: transparent, opaque, and non-transparent.

Low Power Consumption

The Tsi384 has typical power consumption of 1.3W, and incorporates advanced power management to minimize power consumption during operation. In addition to supporting D0, D3 hot, and D3 cold power management modes, the device permits unused PCIe lanes to be powered off automatically or by configuration.

Transparent, Non-transparent, and Opaque Bridging

Transparent mode operation is available for efficient, flow-through configurations, while non-transparent bridging allows isolation between the Tsi384's PCIe and the PCI/X domains. Non-transparent bridging also enables multi-host systems and is used in applications such as storage adapters. Opaque mode provides semi-transparent operation for multi-processor configurations and enhanced private device support.

High Performance

The Tsi384 incorporates many advanced PCIe protocols that increase system performance, including: Lane Reversal and Polarity Inversion, end-to-end CRC, ASPM L0 link state power management, and Hot Plug. In addition to low-latency operation, the device supports a maximum payload size of up to 512 bytes to allow better throughput efficiency.

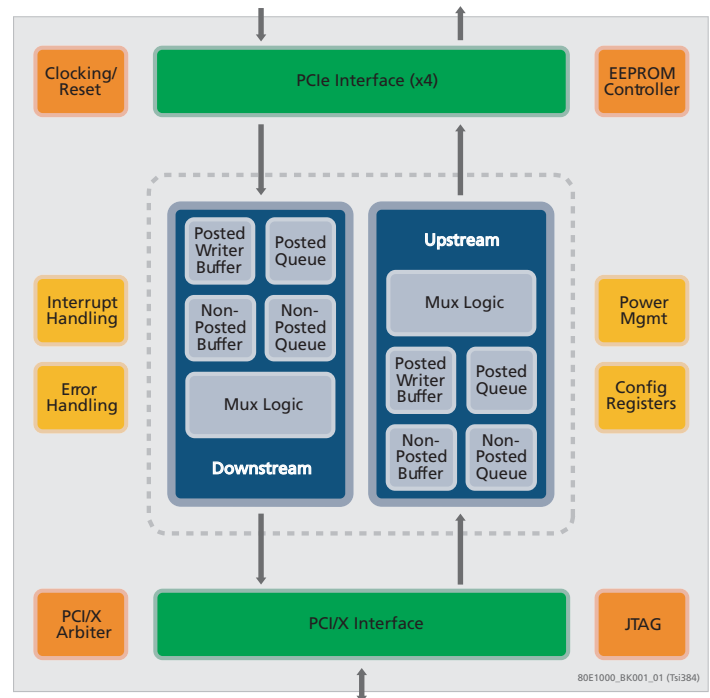

Figure 1 Tsi384 Block Diagram

Features

- General
 - PCI Express to PCI/PCI-X Forward bridge
 - Transparent, Non-transparent, and Opaque modes
 - Low latency – Superior queuing and buffering architecture maximize throughput and minimize latency
 - Compliant with the following specifications:
 - PCI Express Base 1.1
 - PCI Express PCI/PCI-X Bridge 1.0
 - PCI-to-PCI Bridge Architecture 1.2
 - PCI Local Bus 3.0
 - PCI-X 2.0 (mode 1 only)
 - PCI Bus Power Management Interface 1.2

- **PCI Express**
 - Configurable as 1, 2, or 4 lanes
 - 512-byte maximum payload
 - Advanced error reporting capability
 - Supports Lane Reversal and Lane Polarity Inversion
 - End-to-end CRC check and generation
 - Up to four outstanding memory reads
 - ASPM L0s link state power management
 - Legacy interrupt signaling and MSI interrupts
 - Hot Plug support
- **PCI/PCI-X**
 - 32/64-bit addressing
 - 32/64-bit data
 - PCI-X operation at 50, 66, 100, and 133 MHz
 - PCI operation at 25, 33, 50, and 66 MHz
 - Up to eight outstanding memory reads
 - 4K read completion buffer
 - Four external PCI/X masters supported through internal arbiter
 - Support for external arbiter
- **Other**
 - Support for Masquerade mode
 - JTAG IEEE 1149.1, 1149.6
 - Support for D0, D3 hot, D3 cold power management states
 - 1.2V core power supply
 - 1.3W typical power consumption (x4 PCIe to 133-MHz PCI-X)
 - Packaged in 17x17 mm, 256-pin PBGA
 - Package pinout and footprint compatible with PLX8114

Benefits

- Enhances system performance by delivering high throughput and low latency across bus interfaces
- Simplifies system design by offering numerous programmable features
- Minimizes system power consumption by providing comprehensive power management

Typical Applications

The Tsi384 is suited to applications that need to bridge from PCIe to downstream PCI-X and PCI devices. Its flexibility, high performance, small footprint, and low power consumption, make it ideal for a wide range of applications, including:

- Storage Area Network (SAN, RAID HBA cards)
- Network Attached Storage, Direct Attached Storage (NAS, DAS)
- Line cards and NICs

- Routers and switches
- Motherboards (server, SBC, industrial PC)
- PC adapter cards (communications, graphics, imaging, and multimedia)
- Multi-function printers
- Digital video recorders

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
 - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
 - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
