Description

The P9221-R-EVK Mass-Market Evaluation Board demonstrates the features and performance of the P9221-R 15W Wireless Power Receiver (RX). It is intended to evaluate the functionality and performance of P9221-R. The P9221-R-EVK offers the flexibility to program parameters, such as output voltage, over current limit threshold, and external temperature sensing function. It also enables tuning the Foreign Object Detection (FOD) by connecting the center tap of the on-board resistor dividers to each of these pins. The printed circuit board (PCB) has four layers. The P9221-R Evaluation Board is designed to function with the P9242-R Transmitter Evaluation Board, which is ordered separately. It can also be used with the user’s WPC-1.2.2 compliant transmitter.

The high-efficiency, turnkey reference design is supported by comprehensive online, digital resources to significantly expedite design-in effort and enable rapid prototyping. The total active area is optimized to 28 mm x 15 mm.

Features

- P9221-R evaluation board with support for WPC-1.2.2
- Up to 15W output power
- Selectable output voltage: 12V or 9V
- Adjustable over-current limit
- External FOD tuning
- Power transfer LED indicator
- Alignment guide information using the PCB coils
- 4-layer PCB
- Total active area: 420 mm²
- Fully assembled with test points and coil fixture

Important Notes

Disclaimer

Integrated Device Technology, Inc. and its affiliated companies (herein referred to as “IDT”) shall not be liable for any damages arising out of defects resulting from

(i) delivered hardware or software
(ii) non-observance of instructions contained in this manual and in any other documentation provided to user, or
(iii) misuse, abuse, use under abnormal conditions, or alteration by anyone other than IDT.

TO THE EXTENT PERMITTED BY LAW, IDT HEREBY EXPRESSLY DISCLAIMS AND USER EXPRESSLY WAIVES ANY AND ALL WARRANTIES, WHETHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE, STATUTORY WARRANTY OF NON-INFRINGEMENT, AND ANY OTHER WARRANTY THAT MAY ARISE BY REASON OF USAGE OF TRADE, CUSTOM, OR COURSE OF DEALING.

Restrictions in Use

IDT’s P9221-R-EVK Mass Market Evaluation Board is designed for evaluation purposes only. It must not be used for module production or production test setups.

1. Setup

1.1 Required or Recommended User Equipment

The following additional lab equipment is required for using the kit:

- P9242-R Transmitter Evaluation Board or any WPC-1.2.2 compliant transmitter.
- Power supply or 12V/2A AC adaptor

1.2 Kit Hardware Connections

Follow these procedures to set up the kit as shown in Figure 1.

1. Set up the P9242-R Evaluation Board (or user transmitter) according to the board's user manual
2. Place the P9221-R-EVK on the transmitter (TX) pad with the components facing up as shown in Figure 1.
3. Verify that the green LED is illuminated – coupling has been established.
4. Connect wires to the VOUT and GND test points to measure output voltage and apply a load.

2. Usage Guide

2.1 Overview of the P9221-R-EVK

Figure 2. P9221-R V2.1 Evaluation Board Features

2.2 VOUT (Output Voltage) Modification

The P9221-R output voltage can be set to 9V or 12V by changing the R34 or R33 resistors value; see Table 1. The default output voltage is set to 12V. For applications where the transmitter is capable of delivering only 5W, the P9221-R will automatically switch to 5V to ensure 5W power delivery. The 5W option can be disabled by adding R33.

2.3 Alignment Aid – ALIGNX and ALIGNY

The signal magnitude on the P9221-R’s ALIGNX and ALIGNY pins provides directional alignment information by measuring the phase between the input power AC signal and the horizontal (ALIGNX) and vertical (ALIGNY) alignment signals. Once the signal is measured in the analog-to-digital converter, the alignment information is represented by two 8-bit signed numbers, which can be read via the I2C interface from the Align_X and Align_Y registers (see the P9221-R Datasheet).

The difference in the electromotive force (EMF) voltage of the two coils can be represented by the amount of magnetic flux, which depends on the misalignment position of the receiver coil relative to the transmitter coil. With the combination of two symmetrical coils on the vertical (Y) axis and horizontal (X) axis, it is possible to sense alignment in two dimensions as shown in Figure 4. The trace length and width were designed with 452.12mm and 0.254mm respectively for each segment coil on the P9221-R Evaluation Board, which was assembled with the AMOTECH ASC-504060E00-S00 coil as shown in Figure 4.
Figure 4. Recommended Structure of the X-Y Alignment Coil
2.4 Adjustment of Over-Current Limit

The P9221-R includes the programmable current limit feature for protecting the device in the event of an over-current or short-circuit fault condition. If the output current exceeds the programmed threshold, the P9221-R will limit the load current by reducing the output voltage. The current limit should be set to 130% of the maximum output current by setting the voltage on the ILIM pin as shown in Figure 6 by adjusting R22 while keeping R38 as 10kΩ, which is connected to the 1.8V supply. The default value for the over-current limit is set to 1.6A.

Figure 5. R38 and R22 PCB Location

Figure 6. Over-Current Limit vs. ILIM Pin Voltage
2.5 External Temperature Sensing – TS

The P9221-R includes an optional temperature sense input pin, TS, used to monitor a remote temperature, such as for a coil or a battery charger.

The TS pin voltage can be calculated by Equation 1.

\[ V_{TS} = V_{VDD18} \times \frac{NTC}{R19 + NTC} \]  

Where NTC is the thermistor’s resistance and R19 is the pull-up resistor connected to the 1.8V supply voltage on the P9221-R Evaluation Board. The over-temperature shutdown is triggered if the voltage on the TS pin is lower than 0.6V. The RTS is not populated on the P9221-R Evaluation Board.

Figure 7. Optional External Temperature Sensing by Connecting an RTS Thermistor

![Optional External Temperature Sensing by Connecting an RTS Thermistor](image)

2.6 Receiver Coil

The following coil is recommended with P9221-R receiver for 15W applications for optimum performance. The recommended vendor has been tested and verified.

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.

2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.

3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.

4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.

5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below.

   "Standard":
   - Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
   - Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.

   "High Quality":
   - Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.

   - When using Renesas Electronics products, refer to the latest product information (data sheets, user’s manuals, application notes, "General Notes for Handling and Using Semiconductor Devices", in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.

7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.

8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.

9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations administered by the governments of any countries asserting jurisdiction over the parties or transactions.

10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.

11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.

12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
